Subject: 08/01049/FUL - Top Range Motors - 2a Stapleton Lane - Amended Plans

Barwell Parish Council Planning Committee consider the amended plans to 08/01049 last night.

The Council objects most strongly to the application. The Council stands by its previous comments and wishes to add the following:-

- The site is currently an employment site and that this development will mean job losses
- The Car Lift will cause traffic congestion not only outside the development but inside as well.
- The car lift will be a noise hazard
- The development still overlooks the school
- That refuse lorries would cause traffic problems whilst emptying the rubbish
- With already too many flats in Barwell the development threatens the demographics of the village which will not serve the needs of local residents
- The Development matches the co-op which is an eye sore – the development would be better matching better buildings in Barwell.

I'd be grateful if these comments could be passed onto Mr Metcalfe who is dealing with the application
