Dear Sir

CONTRACT NO 07488
LEICESTER ROAD, HINCKLEY

With reference to the above development and our recent conversation, I can confirm that we are still in discussions with Severn Trent Water Limited for a foul and surface water connection.

We have recently undertaken a porosity test to ascertain whether soakaways are a viable option and we have also undertaken a drainage survey to determine how the existing site is draining.

COPY

We are also looking at other options which include rainwater harvesting and porous paving.

However, our first option would be to discharge the surface water into the existing public sewer that runs adjacent to the site at a restricted discharge with additional flows attenuated on site.

We trust you find the enclosed self-explanatory, however, should you require any further information please do not hesitate to contact this office.

Yours faithfully
For Stewart & Harris Limited

Riaz Alam

enc

- STW - will confirm whether they can legally deny foul connection
- Surface water may not be defended at appeal.
