Dear Sir

Please find enclosed the forms, plans and payment.

We hope to adapt the north facing patio area into an Orangery which would be more in keeping with the style of house. Permission was granted for a conservatory back in August 2005 the existing patio base is of a beam and block construction, the dwarf wall that is already in place has been knocked down to DPC level and rebuilt up 600mm to match house construction and complies with building regulations. The window area will be over 50% and the roof will be made up of a flat roof with 2 atrium's covering 70%. Please confirm Building reg's are not required and a fee is not required.

Yours Faithfully

Michael Sloan.
