About our club

The club was started on the 7th May 1997, with seven members, we now have a limit of forty members

The aim of our club is the restoration and preservation of old barn engines (stationary engines), tractors, and relevant machinery, dairy and milking equipment, old farmhouse kitchen equipment including washing and ironing aides, lamps, tools ,in fact anything that gives an insight as to how the farmer and his wife used to work and live. There is nothing our members enjoy more than taking our machinery and equipment to schools, fetes, vintage rallies etc (we do this free of charge) to give the public a chance to enjoy and reminisce with our equipment.

As we show to the public we have a very strict safety code of practice that has to be adhered to at all times and every member is covered by a public liability insurance that is included in club membership.

We hold a monthly meeting at St. Mary's Church, Atherstone, these meetings are attended by approximately 16-20 local members, other members living as far afield as Cumbria, Yorkshire, Blackpool etc.
