Morning Ebbony,
the property has no mains gas therefore the logs are used as a primary source of heating in a log burning stove as opposed to a "decorative" feature of an open fire so the logs are delivered in bulk and used all year round, especially during the winter months.In recent months there have been spates of arson where outbuildings and hay barns have been targeted in Sutton Cheney, Dadlington, Bull in Oak and Desford.Some of the fires were set in close proximity to the main residential property so for safety the client wishes to store the logs which are highly combustable in a separate building.

Also as mentioned in the DAS, once the lake permission is implemented there will be additional equipment related to the fish stocks including a rigid dingy.

Simon
