To summarise, The IPPC permit has been issued on the basis that AMFin have demonstrated a robust management system to prevent and contain substances in the respective scenarios of normal operations and an incident. The site is also a registered COMH premises with the HSE and their requirements have also been satisfied by the practices and procedures set out in AMFin's IPPC application process.

These figures and classifications were the ones specified by Nuneaton and Bedworth Borough council on our previous site's "Hazardous substances consent"

Stored substance classification.	**COMAH / Planning permission threshold. (Kg)**
Very toxic	600
Toxic	600

Toxic and very toxic on this table purely relates to stored raw chemical, which is a checkable/auditable quantity.

The "COMAH scan PDF" shows lower tier COMAH thresholds for the substances listed (column 2) for the catagories in question.

Full quantities on site are:

Toxic-53.348 Tonnes (Liquid form)
Toxic-0.6 Tonnes (Solid form)
Toxic Total-53.948 Tonnes

Very Toxic-9.029 Tonnes (Liquid form)
Very toxic-0.6 Tonnes (solid form)
Very toxic-9.629 Tonnes
