

Parking to Garden ratio (main spine road)

Regarding the parking-to-garden ratio on the road frontage, following an examination in a linear format. Here's a summary:

- Plots 91-116 (in isolation): 66% Parking vs. 34% Garden
- Full length of road: 48% Parking vs. 52% Garden
- Both sides of the spine: 33% Parking vs. 67% Garden

As you can see, when considering the full length and both sides of the road, the amount of garden significantly exceeds parking.
