Recommend Refusal	
Holding Objection - Further information required	✓
REASON FOR RECOMMENDATION:	
• The proposal is for the erection of a car port to the side of the existing property. • The application site has a confirmed bat roost dating from 2010, the dwelling is surrounded by vegetated gardens and mature trees which connect to near-by greenspaces providing foraging and commuting routes for bats. • The development has the potential to alter the building and impact on existing roost features, in addition to foraging and commuting routes around the dwelling. • Therefore, a Preliminary Roost Assessment for bats will be required of the building and to assess any potential impacts the car port may have on the bat roost, including construction and on-going maintenance. • There is a holding objection until this is supplied.	

- The ODPM Regulations require protected species surveys to be submitted prior to determination of a planning application. It is also essential that the extent that they may be affected by the proposed development is established before the planning permission is granted. Reference: Paragraph 99 of ODPM Circular 06/2005 (Biodiversity and Geological Conservation – Statutory Obligations and their Impact within the Planning System). Therefore, any further surveys recommended within the report would need to be carried out prior to determination.

BNG Specific

- Mandatory BNG does not apply as the application is a 'householder application'.
