Subject: RE:

Hi Debbie,

As the demolition is involved I would request a bat survey due to the area of woodland immediately to the east of the site. With regards to the ecological site to the north, it is unlikely that the demolition of these buildings would be impact the ecology of the site, provided that the works could stay within the plot boundary. However, if the development was to encroach on this site, or on the boundary, a botanical survey may be needed.

Kind Regards,

Kirsty

Hi Mark,

Can you please tell me if you would require an Ecology Survey for the demolition of a property at 69-71 Newbold Road, Barlestone? There is an Ecology site adjacent to it.

Regards

Debbie Phillips
