Dear Mr Jackson

In reply to your queries:

1) I am not planning to erect any floodlighting now or in the future.
2) I am not going to remove any trees on any of the boundaries. I am going to prune back the scrub on the north eastern boundary but not actually remove any actual trees or bushes.
3) No trees will be removed along the side boundaries. The fence will be erected inside the line of mature trees.
4) The manure will be removed from the menage each time it is used and stored on an existing muck heap at the top end of my paddock (which is then used to fertilise my garden).

I hope this satisfies your enquiries.

With kind regards
Miranda Steel

Mrs Steel,

Further to our meeting on site last week (9/11/11) I am emailing you for a few points of clarification:-

1) Are you proposing to install any flood lighting as part of the proposed development, are you proposing to install floodlighting in the future?
2) Are you proposing to remove any of the boundary trees as part of the proposed development, particularly along the side boundaries- You stated on the site visit that you intend to clear some of the scrub area and less dense tress along the north eastern boundary.
3) Are any trees along the side boundaries (north east and north west) proposed to be removed to facilitate the 1.35m high fence to be erected around the perimeter of the ménage or is the fence to be erected inside the line of the mature trees.
4) What are the proposed arrangements for the removal and storage of manure from the ménage.

Your earliest response on these matters will be appreciated. I look forward to hearing from you in due course.

Kind Regards

Scott Jackson
