Hi Scott /Simon.

Please find attached a rough drawing of Aspects production layout at Unit 1 Harrowbrook, Hinckley. The proposal for the position of the manufacturing area including extraction is approximately four times the distance we are from houses at our Sileby factory.

With regard to Volatile Organic Compounds used within our printing department. I can confirm that based on a 6 month survey, the average VOC's in that period is 182 kg.

Should you require any further information, please do not hesitate to contact me.

Regards

Gary Clarke - Managing Director
