Subject: CONDITION RELEASE FOR EXTERNAL MATERIALS TO GARAGES PERMISSION POOL HOUSE, GROBY

Hello Barry and Rob,

Following my discussion and agreement with Barry, we have selected :

1. Siberian Larch for the wooden cladding on the garages. This is a natural material which will naturally turn a silvery grey after a few years. It is low maintenance and will match the Welsh slate roof. As per photo examples on www.ehbuildings.com

2. Welsh Slate for the roof. This is a natural material that will match adjacent buildings and compliment the cladding.

3. Retaining wall this will be finished in reclaimed bricks from on site. It will be a perfect match with brickwork approved and used on the outbuildings. It will match the extension bricks on the recent barn conversion.

Can you please add this information to the condition release application recently submitted to Rob.

This should then lead to the conditions released.

Many thanks

James Everson-Crane
