Subject: Application to crown crop

Dear Ms Darke

Ref 08/00727/TPOCA

Some months ago, as a result of a request from my house insurance brokers, I made an application to apply some limited cropping to an oak tree that subtends our garden. As a result it was discovered that the tree in question was not subject to a preservation order. Now that the preservation order is in place can I renew my request that a limited crown cropping be allowed to prevent too much overhang of my property?

Regards

George Lees
