Quotation
For Tree Work At:

Grove House, Manor View, Sibson
Occupants Mr + Mrs Bingham
Option 1. Dead wood Ash: £100
Option 2. Pollard Ash by 50%: £240
Option 3. Fell Ash and grind: £400
Additional Tree
Sycamore Fell and grind: £250
NOTE: In my opinion I believe option 3 would be more beneficial to occupants because of excessive dead wood. From discussion with occupants there is reason to believe that ground was built up around trees which would explain poor condition of tree. It is in close proximity to the house and would be extremely difficult to perform a crown reduction due to lack of suitable growths and buds, crown of tree is very sparse. I don't believe the tree would benefit from a pollard as Ash tree's are not susceptible to heavy pruning.
If a decision can not be met then I suggest an aboriculturlist does a site visit and assess the best practice.
The Sycamore has visible heart rot and stress cracks. If the tree was to come down due to weather, it would damage nearby buildings hence why I believe the Sycamore should be felled and ground also. Occupants have mentioned that they'd be more than willing to replant other trees slightly off set from problem trees.
NOTE: Nuneaton Tree Surgeons are NPTC qualified and are not able to make decisions on T.P.O trees. We are only able to carry out tree work which may commence. We have public liability insurance for 5 million but no public indemnity insurance so all decisions would have to be made by Hinckley and Bosworth Council. Any queries please contact Nuneaton Tree Surgeons.
