Our Ref: NX/INF/LOC/1412.70 (KG)

Dear Sir

We note that this application also involves lighting. However, the extent and spillage of the light is unclear from this application. At the present time, it appears that the playing fields are not lit. Any extra lighting, particularly directed towards the hedgerows surrounding the site could interfere with bat foraging.

We would therefore recommend that a plan is submitted to show the spread of the light, from these proposed columns. These diagrams should show the spread and direction of the light. We would appreciate these prior to the determination of the application.

We hope that our comments and recommendations will be of use to you.

Yours faithfully

Kirsty Gamble
Planning Ecologist

Historic and Natural Environment Team

Please note: Our information and recommendations result from our best knowledge of the site to date. It may change if further information is discovered. It remains the responsibility of the applicant to ensure that no protected species or their habitat is damaged during the works. The best method of achieving this is for a suitably experienced and licensed ecologist to conduct a full survey for protected species at the appropriate time of year in appropriate weather conditions.
