Section 1 Introduction

1.1 Background

This Report has been prepared to support a *Full Planning Application* whose aim is to extend the development permitted by *Outline Planning Consent* Ref 15/00188/OUT at *Normandy Fields* in Hinckley from 850 to 1,003 dwellings. In so doing, it has been assumed that it will operate in a post Covid-19 world. The Planning Authority for the submission is *Hinckley & Bosworth Borough Council* (HBBC), whilst responsibilities for Highways & Transportation fall to *Leicestershire County Council* (LCC).

This version of the *Normandy Fields Travel Plan* (or NFTP as it is to be known) has been developed by *Bloor Homes (Midlands) Limited* (Bloor – the Developer) to support the proposed extension of Phase 4 at the Normandy Fields site (**Appendix A**). **Termed Phase 4+** herein, it will aid development across adjacent phases in accordance with the requirements of the original *Outline* and is based on the approved submissions for Phases 1, 2, 3, 7 & 8; the first three of which are under construction. As of today, 125 of the approved 540 units have been occupied. A Reserved Matters Application is pending for Phase 4, which would add a further 97. The Masterplan for the Phase 4+ is provided at **Appendix B** and encompasses 153 dwellings.

For the purposes of identification, the two authorities noted above are referred to as *The Councils* within this Report.

The NFTP is based on sustainable transport principles which are aimed at reducing dependency on private car use. For travellers, *The Plan* promotes walking, cycling and public transport as the main initiatives in order to reduce traffic congestion resulting from the site. Additionally, this version of the NFTP intentionally provides the opportunity for residents to *Work-from-Home* to avoid the need to travel altogether, through the provision of *High Speed Broadband* connections to each dwelling. Home working proved very popular during the Covid-19 lockdowns and has thus been included herein as a legitimate and valid alternative to car travel.

1.2 Existing Transport Infrastructure & Required Improvements

The site is part of a proposed mixed-use development covering 45.4 hectares of land to the west of the A47 at Hinckley in Leicestershire. It is located approximately 2km west of Hinckley Town Centre as shown below, with Phase 4+ shown on **Figure 1**:-

Plan 1 - Site Location Schematic

Figure 1 - Site Location Plan

Full Planning Consent has been granted for the first 540 units as noted above. An extant *Outline Planning Consent* also covers the development of up to 850 Dwellings in total (Use Class C3); local convenience Retail Development of up to 500 sqm (Use Class A1) which has recently opened as a Co-op; a Primary School (Use Class D1 – for 210 pupils); Community Facilities (Use Class D2); Sports Pitches, Parkland, Children's Play Areas & Allotments and Public Open Space & Landscaping.

Vehicular access to the development will be via Phase 4, as indicated at **Appendix B**. The internal road system to the site as a whole has already been designed to allow public transport circulation whilst a network of attractive routes for pedestrians and cyclist is also available to promote these as the modes of choice for local trip-making.

A package of measures was required as part of the Planning Consent and Section 106 Agreement for the development to promote the safe and efficient operation of the proposed site access and provide improved linkages between the site and adjacent areas of Hinckley for pedestrians and cyclists. As a result, the *Base Position* with regards to access now comprises:-

- A reduced Speed Limit on Normandy Way between the Wykin Road Roundabout to the north of the site and the Roston Drive Roundabout to the south, from 50 mph to 40 mph;
- A Toucan Crossings on Normandy Way immediately to the south of the site access and on the access road within it, for use by pedestrians and cyclists. A further informal crossing is available on Normandy Way towards the northern end of the site frontage for use by pedestrians and cyclists, with connecting footway/cycleway provision within the site also being provided;
- The re-allocation of highway space on Normandy Way with the carriageway being reduced to 7.3 metres between the Wykin Road and Roston Drive Roundabouts to allow widening of the cycleway on the eastern side (far-side) to 3.0 metres, thereby connecting with the network of walking and cycling routes serving Hinckley (see below).

1.3 Sustainable Access

Walking is considered the most important mode of travel at a local level with potential to replace short car trips particularly under 2 kilometres, whilst cycling also has the potential to substitute for short car trips, particularly those under 5km. The existing walking catchments are shown below and on **Figure 2** along with relevant local destinations, with the key catchment extending to Hinckley Town Centre to the south-east of the site. It also includes substantial residential areas of the town to the immediate east of the A47 and major employment areas along the A47 corridor to the north and south of the site. Pedestrian access from Phase 4+ to the A47 is proposed.

Wykin Community Park on the eastern side of Normandy Way is easily accessible on foot, whilst facilities provided within the site itself include a Primary School and a recently opened Co-op Local Store. Both are within easy walking distance of all parts of the site.

Plan 2 – Walking Catchments

In addition to footways provided alongside the various existing roads, a network of *Public Rights of Way* (PRoW's) is available for pedestrian movement, as indicated in **Appendix C**. PRoW's passing through the extant development have been retained and enhanced, whilst access to others that adjoin provides a useful leisure resource for residents and further options for pedestrian movement and connectivity.

The 5km cycling catchment includes the full extent of the Hinckley Urban Area as well as parts of Nuneaton (including the Town Centre) and Barwell. In this context LCC has provided a plan showing the network of routes for cyclists that are currently available in the Hinckley area and this is included at **Appendix D**.

A continuous surfaced cycleway is available to the east of the A47 and extends over the full length of the *A47 Hinckley Northern Bypass*. The cycleway has been widened to 3.0 metres between the Wykin Road & Roston Drive Roundabouts as part of the extant development as noted above. It provides convenient access to employment areas along the A47 corridor to the north and south of the site as can be seen from the County Council's plan, with access to it being available by means of a new Toucan Crossings. Cycling to the Town Centre via the *Outlands Drive Cycle Route* is a realistic option, since at a distance of just 2km it would take only 8 minutes at a normal cycling speed of 15kph to reach. Employment opportunities, shopping, leisure and community facilities are thus conveniently accessible to cyclists based at the site, as is the Railway Station.

Hinckley is served by a well-developed network of bus services emanating from the Town Centre, as detailed in **Appendix E**. Frequent services are available from the main Bus Station to Leicester, Nuneaton and Coventry via various routes, whilst a range of Local Centres including Earl Shilton, Barwell and Burbage are also served.

The layout of the extant development has been designed to allow access by buses (historically referred to as Route 10 but currently operated as Route 11 by Stagecoach), with all dwellings including Phase 4+ being located within 400 metres of a future bus stop. Route 11 has recently been extended into the site, with the first bus stop being located close to the Site Access Roundabout and Co-op Local Store. It is currently served via a U-turn at the first on-site roundabout, with all buses then leaving to continue to their ultimate destinations via the same route. As the scale of development increases however the initial bus service will be organically extended, with buses circulating around the major residential areas as parts are built-out. The provision of these new or extended bus services is fully covered by Schedule 7 of the extant Section 106 Agreement for the main site.

Passenger Rail Services are available from Hinckley Railway Station (approximately 3.5km from the site) from whence trains run on the Birmingham New Street to Leicester line each day, with most services calling at Nuneaton and Coleshill towards Birmingham and at Narborough en-route to Leicester. Journey time by train is approximately 39 minutes to Birmingham and 19 minutes to Leicester.

Some 70 car parking spaces are provided at the Station, making multi modal journeys possible. It is conveniently accessible by cycle too as noted above and is served by buses on Routes 3, 7 & 8. Rail may thus be considered as an option for journeys to and from the main urban centres of Nuneaton, Coleshill, Birmingham and Leicester.

Based on the above analysis and the available local infrastructure, it is considered that there are significant opportunities for trips generated by the development to be made by cycle. These include the potential for longer distance multi-modal journeys and in particular use of the Local Rail Network via Hinckley Railway Station.

1.4 Nature of the Development

Through the submission of a *Full Planning Application* for Phase 4+, Bloor Homes wishes to extend the development permitted by *Outline Planning Consent* Ref 15/00188/OUT at Normandy Fields from 850 to 1,003 dwellings. This will be achieved by extending Phase 4. To date 125 of the fully approved 540 have been occupied, with a further 97 pending at Phase 4 via a *Reserved Matters* submission.

1.5 The Travel Plan Proposals

The main reason for introducing a *Travel Plan* arises from the planning priorities for the site and the parking and travel demands emanating from it. The NFTP therefore identifies a range of alternative transport means to the site and also other ways of reducing car usage in overall terms. Proposals include:-

- Measures to provide more travel choice;
- An implementation strategy for the proposals;
- Targets for travel by various modes;
- Proposals for monitoring the Plan.

Section 2 Planning Context

2.1 Current Position

The site benefits from an *Outline Planning Consent* (OPC) Ref 15/00188/OUT covering 850 dwellings and various *Full Planning Consents* and *Reserved Matters Approvals* for the first 540 across Phases 1, 2, 3, 7 & 8. A further 97 are pending at Phase 4 as part of a *Reserved Matters* submission covering that part of the site.

This version of the NFTP has been developed specifically to support Phase 4+, which would see the 850 total being raised to 1,003 as part of a *Full Planning Application*. In so doing, it has been assumed that Condition 7 of the *Outline* will be rolled-out across Phase 4+.

For reference, Condition 7 states that:-

In accordance with the Phasing Plan, prior to the occupation of each phase a Residential Travel Plan, in accordance with the Framework Travel Plan, shall be submitted to and agreed in writing by the LPA. The measures approved shall thereafter be provided.

In addition, it is noted that the Section 106 Agreement for the main site provides for a number of sustainable transport measures including the provision of new bus stops and a permanent route extension; payments to cover free bus travel and public transport subsidies. These are to be enacted partly by the Developer and partly LCC. They are referenced herein and included as part of this NFTP proposal, on the assumption that they too will be incorporated in some form into any subsequent Consent covering Phase 4+.

Section 3 Travel Plan Limits

3.1 Limits of Application

This version of *The Normandy Fields Travel Plan* is intended to cover only the 153 residential units that form part of the Phase 4+ development defined by the current Phasing Plan at **Appendix A** and the site Masterplan at **Appendix B**. It does not relate specifically to any other adjacent residential areas that may be brought forward by the housebuilder, nor the non-residential components of the overall development.

3.2 Lifespan

The Normandy Fields Travel Plan will run from first occupation for a period 5 years. This period will however be extended for a further year should the targets stated at **Section 4.3** below not be met by the end of that period and additional remedial actions in accordance with **Section 5.2.9** be required. It will in any event run for at least one year after the occupation of the last dwelling on the combined site or phase, as appropriate.

Section 4 Overall Development Transport Policy

4.1 Point of Contact

The *Normandy Fields Travel Plan* and the transport policies contained within it have been developed by *Lawrence Walker Limited* (LWL) in conjunction with Bloor. They are intended for implementation as part of the development proposals for the site.

All responsibilities for the NFTP, its policies and ultimate implementation rest with LWL, who's nominated **Travel Plan Co-ordinator** for the site is:-

Mr. Steven Johnstone
Lawrence Walker Limited
Church Farm
Leamington Hastings
Warwickshire CV23 8DZ

Tel - 01926 632111
Email - lw ltd@btopenworld.com

4.2 Travel Patterns & Surveys

Phases 1, 2, 3 & 7 of the Normandy Fields site are currently under construction and LWL undertook the most recent travel survey of the first two in the Autumn of 2022 based on a methodology that accords with standard industry practices. Whilst an input to subsequent assessments will be a *Questionnaire Travel Survey* of all residents in line with **Appendix F**, it was felt that due to ongoing high Covid-19 infection levels, this was not appropriate at that time. The main source of data thus came from a series of manual travel counts covering both vehicular and non-car modes to allow the performance of the NFTP to be determined. Its findings have been used to tailor this Phase 4+ version of that document.

Since travel surveys are accurate for only a relatively short period of time following their instigation, it is LWL's intention that the survey process be repeated annually. The results of each survey will then be used to review progress against current day and targeted modal splits, as well as a means of testing the effectiveness of any new measures as required. Each travel survey will include a conventional traffic count to enable accurate modal split percentages to be calculated.

4.3 Targets & Objectives

In keeping with the aspirations of the extant Phase 1 & 2 *Detailed Travel Plan* (DTP), the primary objective of this Phase 4+ NFTP will be to ultimately deliver a 15% reduction in peak hour vehicle trips to and from the site over a five year period by limiting SOCD usage to 60% overall. This is a highly challenging target which pre-dates Covid-19 and its legacy. It is therefore proposed that in line with the earlier phases, it will be achieved through the establishment of 30% non-car driver usage once the site has been in operation for at least 12 months, coupled with an overall 10% reduction in two-way external travel through home working.

With this in mind, rounded broad targets and overall trip rates per 100 dwellings have been established by LWL as informed by the 2022 Phase 1 & 2 surveys, which centre round achieving the proposed non-car based trips. They will apply to (and be measured across) the entire development, from the approval of this Phase 4+ version of the NFTP to completion of the site unless otherwise revised by subsequent versions of The Plan in the interim.

Table 1: Reference Person Trips (Per 100 Dwellings)

Mode	Person Trips			
	AM (In)	AM (Out)	PM (In)	PM (Out)
Total Movements (Including Virtual)	25	60	55	30
Car	19	45	41	23
Car Share (Passenger)	1	3	3	1
Public Transport (Bus)	1	2	2	1
Rail	-	-	-	-
Walk/Cycle/Other	4	9	8	5
Working from Home	-	1	1	-

Table 2: Target Person Trips (Per 100 Dwellings)

Mode	Person Trips			
	AM (In)	AM (Out)	PM (In)	PM (Out)
Total Person Trips	25	60	55	30
Car (SOCD's) 60%	15	35	30	20
Car Share 10%	1	6	6	1
Public Transport 5%	1	3	3	1
Walk/Cycle 15%	5	9	9	5
Work from Home 10%	3	7	7	3

4.4 Actions

In addition to the above numerical targets for the various travel modes considered, five key “*Headline*” initiatives will also be enacted as the development progresses to assist in their delivery.

These “Action” type targets take the form of specific commitments that have been tailored to aid their delivery and allow for easy monitoring. They are specific, measurable, achievable and time-bound in the context of the site’s delivery programme, and comprise the following five key measures listed below:-

- Provision of up-to-date cycle and walking maps and associated health advice, together with new on-site signage by the end of 2023;
- Agreement with The Councils to use similar “Welcome Packs” to those provided for Phases 1 & 2 (**Appendix G**) and the publication thereof by the autumn of 2023. It should be noted that these have been re-purposed and deployed at five Bloor sites in Leicestershire, including Dickens-le-Heath and Anstey, as well as all Phases at Hinckley. Their deployment at Hinckley Phase 4+ is intended as an interim measure to fill a void left by the County Council’s failure to deliver a similar document in line with their Section 106 obligation prior to houses being occupied, for which funding has already been provided by the Developer;
- Agreement with The Councils to continue to use the Travel Survey pro-forma and Monitoring Report format deployed across Phases 1 & 2 when required at the end of 2024, as provided herein at **Appendix F**;
- Joining of the Liftshare.com web-based car-share scheme before the end of 2023;
- Provision of a draft Travel Webpage for the development by the end of 2023 and a fully operational version by the end of 2024.

4.5 Objectives

The three main transportation policy objectives which apply to the development will be as follows:-

- To ultimately achieve a *15% Reduction* in overall SOCD car usage associated with the development through the achievement of 30% non-car driver usage;
- To encourage *Home Working* and thereby achieve an overall reduction of 10% in total journeys made to and from the site;
- To promote *Walking & Cycling* as the primary means of transport;

4.6 Management Support

Travel Plans can fail to operate properly if there is inadequate consultation between the participants or if the TP in question fails to enjoy management support. An additional measure has therefore been agreed with Bloor Homes which will be given their continuing and full support through an undertaking to provide:-

- Support and funding for their nominated Travel Plan Co-ordinator, who will be charged with liaising with The Councils as part of his duties on a regular basis, with formal meetings being arranged periodically.

Section 5 Specific Travel Plan Proposals

5.1 Principles

Whilst the targets noted above for modal share have been established for the entire development, they are in part subject to influence by each enclave and street as the development progress. A successful *Travel Plan* will involve changing established or desired travel modes across every part, so to do this the NFTP will include both physical “Hard” measures - such as the construction of new footpaths - and other “Soft” measures aimed at improving awareness, or encouraging the use, of more sustainable travel options. Both types of measure are now outlined below.

5.2 Mechanisms

5.2.1 Travel Surveys & Performance Indicators

Travel and traffic surveys will be undertaken towards the end of 2024. They will then be updated annually to determine the reasons for car dependency locally and the possibilities for reducing it in favour of more sustainable transport modes. The best options for reducing car usage can then be determined.

- Travel surveys will be carried out by LWL. Surveys will be repeated during the life of the development on an annual basis and then for five years hence. An example of the current Phase 1 & 2 pro-forma is included as **Appendix F**, which itself includes information on the levels of car ownership to ensure that appropriate provisions are maintained across the site for new residents. Re-use of this survey format will be agreed with the The Councils before its use in 2024.

5.2.2 Travel Plan Co-ordination

The Normandy Fields Travel Plan will be monitored to ensure that it meets targets. This will be carried out by the nominated Travel Plan Co-ordinator who will be responsible for the initiation and publicising of the various NFTP initiatives. The post will remain supported for the lifespan of the Plan.

The primary duties of the Travel Co-ordinator will be introduce and control the following “Soft” measures:-

- To review, develop and oversee the implementation of initiatives outlined in the NFTP and the achievement of the modal shift targets specified therein;
- To promote, market and monitor progress of the NFTP and detect trends in change against targets and report to the The Councils, and;
- To provide “Welcome Packs” for all residents that will be handed out as they move in in line with **Appendix G** (see also **Section 4.4** above).

- 5.2.3 Local provider Arriva currently operates services that connect with the local villages and towns via the A47 (Routes 6/6A/7) along the eastern boundary of the development. Combined, they provide a 60-minute frequency between the main destinations (**Appendix E**). Additionally, there is a Section 106 obligation to provide new bus services into the main site, with a separate provision to allow for future use of the Spine Road by buses with bus stops being located along it. The first stage of this new service has recently been enacted, with Stagecoach operating Route 11 into the site connecting the Co-op directly with the Town Centre as described at **Section 1.2** above. As this service is rolled-out, the entire site will ultimately lie within 400m of a bus stop, representing an attractive offer to new residents. The new bus services are funded by the extant Section 106 Agreement through a Developer contribution.

The impact of Covid-19 greatly reduced use of *Public Transport* (PT) and even today it has not recovered to pre-lockdown levels. It may not do so for several years yet; by which time the Phase 4+ development may well be substantially complete. For this reason, PT has been targeted with achieving only a modest overall level of increase compared to the pre-Covid figure.

There is a requirement within the extant S106 Agreement to fund the provision of free “Taster” Travel Passes for use on existing and extended bus routes, which is being looked after by LCC (i.e. not the Travel Plan Co-ordinator) on behalf of Bloor. However, due to inaction on the part of the former, the Travel Plan Co-ordinator has intervened and issued a small number as part of Phases 1 & 2 to date. This should be noted in the context of remedial measures in accordance with **Section 5.2.9** herein, should any ultimately be required and any additions proposed for Phase 4+.

Overall, the following provisions relating to bus travel will be made to help the **5%** target for all journeys to be made by Public Transport to be met and maintained:-

“Hard” Measures:-

- The provision of further new bus stops within the development and sustainable easy pedestrian access to them from individual dwellings as the site progresses.

“Soft” Measures:-

- The provision of timetable information for all residents from the initial occupation of any new dwelling via the “Welcome Packs”.

In addition, the Travel Plan Co-ordinator will work with the County Council to ensure that funding already provided by Bloor to encourage bus usage is spent and that potential bus travellers are aware of its existence. This will be done mainly through with the continued issuing of the “Welcome Packs” which should fall to LCC to undertake, but is currently being dealt with on an interim basis by Bloor through the Travel Plan Co-ordinator (see **Appendix G**).

5.2.4 Rail Services

The nearest Railway Station to the site is Hinckley, which is approximately 3.5km from the site by road and is thus within easy cycling distance of the development. The Station is served by the Birmingham New Street to Leicester line each day, with most services calling at Nuneaton and Coleshill towards Birmingham and at Narborough en-route to Leicester. Journey time by train is approximately 39 minutes to Birmingham and 19 minutes to Leicester. The Route 6A bus provides a convenient link to the Station from the site via the Town Centre at peak times.

Transport links between the Railway Station and the site will be promoted by the following “Soft” measures, assuming it is safe to do so in a post-Covid world. Rail is not targeted with achieving any specific usage level in the immediate future due to the lasting Covid legacy and extended *Industrial Action*, but a modest patronage over the lifetime of the development would be beneficial, aided by:-

- The provision of bus and rail timetable information for all residents from the initial occupation of any new dwelling via the “Welcome Packs”. This will include a map showing the best walking and cycling routes to the Station.

5.2.5 Passenger Information & Travel Packs

For rail and bus travel, the provision of passenger information is important to ensure that residents will view public transport as a viable alternative to the car. A major task of the Travel Plan Co-ordinator will thus be to disseminate information effectively. This will be made available both physically and electronically to all.

The following “Soft” measures are proposed:-

- A *Welcome Pack* will be provided by LCC to all residents upon occupation in accordance with the extant Section 106 Agreement to ensure that information relating to travel options is available in both a quick and convenient manner (see also **Section 4.4** above and **Appendix G**). Information provided will be up-dated through “Fliers” on a regular basis. The Travel Pack itself will define the role of the Travel Plan Co-ordinator and provide contact details, as well as providing information on walking & cycling routes, local amenities & facilities and bus and rail services, including timetables and route plans. The Pack will also contain application forms allowing each dwelling to claim up to two free six-month bus passes if this is ultimately required by a future Consent;
- The Travel Plan Co-ordinator will circulate details relating to existing “Apps” which provide information on travel and the use of non-car modes via the internet on a *Real Time Information* (RTI) basis. It is intended that these will provide direct links to both Rail and Bus RTI travel information Websites to enable users to download the most appropriate information onto their mobile devices.

5.2.6 Car Sharing

Car sharing is an effective means of reducing the number of cars driven to and from any development that exists in a post-Covid world. For this reason, it forms an important component of NFTP and is targeted with accommodating **10%** of all peak hour journeys to and from the site in future years.

With this in mind, the following “Soft” proposals for car sharing are included as part of the overall NFTP, which will be instigated by the Travel Plan Co-ordinator:-

- Joining of the Liftshare.com web-based car-share scheme;
- Joining of other existing web-based car-share initiatives and sites such as www.goshare.com through the setting up of a private group licence for the site;
- The Travel Plan Co-ordinator will be responsible for maximising car sharing take-up amongst residents. To achieve this, he will contact individuals on a regular basis to maximise the numbers sharing daily journeys. He will also raise awareness with residents of existing Car-Share services, which include the existing www.Liftshare.com website.

5.2.7 Cycling & Walking

Normandy Fields is sited in a sustainable area with good local facilities within easy walking and cycling distance of it, as is shown on **Plan 2**. As a result, **15%** of all journeys are expected to be made on foot or by cycle. The following “Soft” measure is proposed to help encourage non-vehicular travel:-

- The Travel Plan Co-ordinator will promote walking and cycling as suitable means of travelling, highlighting the health benefits thereof.

Important aspects of cycling are security, maintenance and marketing. This is particularly true where the maintenance of lighting is concerned, which should be provided and repaired immediately in order to ensure that routes used by cyclists enjoy the maximum patronage. One of the roles of the Travel Plan Co-ordinator will therefore be to ensure that roads both in and around the site are maintained and the vulnerability of those using them minimised as a consequence.

Another key part of cycling is knowledge, encompassing both routes and the use of cycles themselves. This is particularly true where cyclists may be unfamiliar with routes around the site that have been newly added, or simply where would-be cyclists need a bit of encouragement to make the leap from car to cycle. With this and the previous context in mind, the Travel Plan Co-ordinator will instigate the following “Soft” measures in conjunction with LCC through the “Welcome Packs:-

- Provide up-to-date cycle maps (encompassing both NFTP productions and existing LCC publications) and improved awareness in and around the site to encourage the use of cycles as a means of travel;

- Incorporate journey planning information into all publicity material, through raising awareness of the LCC service operated by their sustainable travel team;
- Ensure that lighting to local roads around the site is adequately maintained.

Walking to the site will be encouraged and there are currently several routes linking the surrounding residential areas to it by both recreational and more direct means (**Appendix D**). To maximise the potential of such routes, the Travel Plan Co-ordinator and Developer will:-

“Hard” Measures:-

- Provide new pedestrian routes connecting to the existing and directly to the A47.

“Soft” Measures:-

- Provide all residents with local walking (and cycling) maps via LCC indicating Public Footpaths and safe walking routes throughout the area, including condition of surfacing, widths, distances and times to local facilities, amenities and popular locations, lighting provisions and major road crossing locations. These will be included with the “Welcome Packs” for the site;
- Raise awareness of Local and National Sustainable Days such as “Walk to Work” day and encourage residents to take part.

5.2.8 Timescales

Specific timescales attached to the five key major initiatives contained within this NFTP are identified in **Section 4.4** as part of the “Action” target strategy. In addition it will also be necessary to make LCC aware of the draft proposals at an early stage due to the need for co-operation and their action if required under a new S106.

To achieve this, it is proposed to implement the following basic programme, independent of the occupation of each dwelling. Timeframes are relative to the formal discharge of Planning Conditions in this respect.

Confirm Travel Plan Co-ordinator with LCC	1 month
Adoption of the Appendix G “Welcome Packs” by LCC	3 months
Provide draft Travel Webpage to LCC	6 months
Confirm re-use of Phase 1 & 2 Travel Survey with LCC	6 months
Confirm re-use of Phase 1 & 2 Monitoring Report with LCC	6 months

5.2.9 Monitoring & Review

Monitoring of the NFTP will be the responsibility of the Travel Plan Co-ordinator, who will hold regular meetings with all interested parties in the pursuance of this responsibility. Apart from receiving regular updates from residents on the site and liaising with The Councils on transport related matters, the main monitoring process will involve travel surveys as described earlier in this NFTP.

Since travel surveys are accurate for only a relatively short period of time following their instigation, the survey process will be repeated in late 2024 and then annually based on the extant Phase 1 & 2 work undertaken towards the end of 2022. This will ensure that the information held by the Travel Plan Co-ordinator is up-to-date. The results of each survey will then be used to review progress against targeted modal splits and also as a means of testing the effectiveness of new measures as required. To do this, the Travel Plan Co-ordinator will calculate the actual number of journeys and percentage share of all travel modes to the site, based on all available information. This will then be presented on a rolling annual basis to The Councils for review. Where targets are not met, remedial actions will be proposed, agreed and then monitored for effect.

The figures calculated will additionally take account of known parameters (such as car movements) which will be counted independently.

- An *Annual Monitoring and Review Report* for the site will be presented to The Councils (at no cost to The Councils) providing a comparison of achievements against targets. Should the SOCD for the period not be met, then the report will contain a spread of possible remedial measures for consideration;
- The report will also include a summary of changes to personnel, any new or changed partnerships and outline plans and proposals for the coming year. In addition, survey results will be circulated to all residents upon the completion of each survey;
- The format of the reporting will be based on that used in 2022 for the Phase 1 & 2 development, but will be subject to agreement with The Councils.

5.2.10 Reducing Travel Demand – Home Working

Home working proved very popular during the Covid-19 Lockdowns and its deployment as a valid alternative to external car travel is thus included as a legitimate part of this version of the NFTP.

To encourage reductions in the overall travel demand associated with the site, a number of measures will be promoted to achieve at least the equivalent of a **10%** take-up in usage. These will include “Soft” initiatives to work from home on a regular basis and “Hard” help, comprising:-

- All new dwellings will have access to High Speed Broadband as part of the development’s construction. This will be available from day-one of occupation and houses will be individually designed to allow easy working.

In order to encourage residents to work from home, the benefits of so-doing will be expounded in the “Welcome Packs” as a series of “Soft” measures. The Travel Plan Co-ordinator will additionally work with the Sales Staff to ensure that all new potential residents are aware of the advantages and possibilities for a life-style change that home working can offer before they buy.

Once in occupation, help with setting-up businesses from home or simply advice on how to arrange time or provide order within the home environment will follow, along with regular visits and encouragement as part of an on-going liaison process. Home working in the modern world is relatively new, but the benefits are substantial and the Travel Plan Co-ordinator will seek to promote these with both residents and their employers. By so doing, it is hoped that some of the better parts of the Covid-19 Lockdowns can be retained and built into a more sustainable future.

5.2.11 Marketing

The *NFTP Travel Webpage* will cover all aspects of travel and offer advice to all in an easy to follow manner. Its existence will itself be promoted by the “Welcome Packs”, “Fliers” and “News Bulletins”; all of which are made freely available to residents of the site on a regular basis.

In addition, a *Community Travel Notice Board* will be provided in a prominent location within the development to allow information to be disseminated in a more conventional manner. Both it, and the NFTP Travel Webpage, will include links to third-party travel Websites of interest such as www.travelineeastmidlands.co.uk and www.sustarns.org.uk to allow dissemination of locally relevant travel information.

- The *Normandy Fields Travel Webpage* will serve as the main marketing tool for the NFTP and will provide free travel information to all users. Its existence will be made known by a series of “Fliers” on a regular basis and by the “Welcome Packs”. Additionally, a *Community Travel Notice Board* will be provided and sited in a prominent location within the development for the lifetime of the TP.

Section 6 Summary & Proposals

6.1 Summary

The Normandy Fields Travel Plan (NFTP) aims to promote sustainable transport through a number of initiatives. It is the framework by which each resident will actively commit himself or herself, both in the short term and long term, to meeting the objectives of a more sustainable transport policy. *The Normandy Fields Travel Plan* sets out targets for realising a tangible modal shift from car to other more sustainable modes, including buses, cycling, walking and car sharing. It also defines the means by which the targets can be met and establishes a response to various factors including:-

- Recognition of the fact that a partnership approach between users, transport operators and the Local Authorities to transport issues is important, and;
- The need to take a pro-active approach to the development and implementation of a sustainable travel strategy for the management of travel demand in line with local and national policies.

6.2 Proposals

The future involvement of all residents is regarded as an important component to the overall success of the TP. Nevertheless, Bloor targets the limiting of car-born *Single Occupancy Car Drivers* (SOCD) to a ratio of no more than 60% of all travel modes upon full occupancy of the development as the principal objective of their sustainable travel strategy. Essential to the formulation and successful implementation of this Phase 4+ plan is a thorough understanding of the travel patterns of all future commuters. This knowledge will allow the NFTP to be tailored and reviewed to achieve the optimum results. The achievement of the traffic reduction target will then depend on the following headline measures, which Bloor undertakes to implement in conjunction with the, residents and the Local Authorities. Bloor will therefore:-

- Appoint and retain a *Travel Plan Co-ordinator* in accordance with **Section 4.1** to oversee all travel policies and implement the NFTP. The role and duties of the Travel Plan Co-ordinator will be as defined in **Section 5.2.2**;
- Promote use of the new *Route 11 Bus Service* as the main vehicular alternative to the private car in accordance with **Section 5.2.3** above;
- Provide a *Welcome Pack* via LCC to each new dwelling upon occupation, to ensure that information relating to travel options is available in both a quick and convenient format as defined in **Section 5.2.5** of this NFTP. Additionally, information relating to existing “Apps” which cover travel and the use of non-car modes via the internet on an RTI basis will be provided;
- Join available *Car-Share Schemes* as defined in **Section 5.2.6** of this NFTP;

-
- Deliver a *Walking & Cycling Initiative* as described in **Section 5.2.7** of this NFTP,
 - Seek to reduce the need to travel through a *Travel Reduction Policy* comprising a *Home Working* initiative as outlined within **Section 5.2.10** of this NFTP;
 - Actively market *The Normandy Fields Travel Plan* in accordance with the methodologies described therein and outlined in particular within **Section 5.2.11**;
 - Provide all secondary and complementary measures described in the NFTP to help deliver the total reduction in single occupancy car use. They shall be delivered in accordance with the timescales defined within this NFTP, or as otherwise agreed with The Councils.

The above forms the basis of Phase 4+ *Normandy Fields Travel Plan* proposed for the development; the details of which remain to be agreed with the officers of The Councils. It is submitted for approval on this basis.

Additional services

There may be other services operating less frequently in your area. Facilities for those with special needs are offered by the Accessible, Community or Demand Responsive Transport service providers. For further information call **0116 305 0002**.

How to use this map

The map is a guide to bus services and connections operating across Leicestershire.

Please contact each service for further information, details are supplied above.

Underlined services are those supported by Leicestershire County Council, other services may have supported journeys.

Printed and online guides

Separate bus guides are available for various locations (identified by the word MAP), including a Leicester Hospitals guide. Visit **www.choosehowyoumove.co.uk/public-transport** for online guides (updates will only occur if services change). Printed versions can be found at local libraries, tourist information centres, local council offices and bus company travel shops.

www.choosehowyoumove.co.uk/publictransport • 0116 305 0002 • choosehowyoumove@leics.gov.uk

- 12/ Bus Information
- 13/ Catch the Train
- 14/ Car Sharing

Welcome to Normandy fields

Welcome to your new Bloor Home. We have provided this Travel Guide to help you settle into your new home and surroundings. It has been prepared as part of a strategy to manage the travel demands of Normandy Fields. The Travel Guide looks at ways you can reduce the need to use your car and provides information on alternative travel options.

We are keen to promote sustainable travel at Normandy Fields and we hope that this guide will help you make the most of local sustainable travel options available.

Situated just off the A47, the Normandy Fields development will extend the existing village community of Hinckley by around 260 homes towards the village of Wykin.

Why do I need a Travel Guide?

The Travel Guide shows you the nearest amenities to your new home and how you can reach them using a range of travel modes, often without the car. It aims to help you look at the way you can travel and how you could reduce the number of journeys you make in your car.

A Travel Co-ordinator has been appointed for new residents and is happy to discuss any queries. Please contact:

Mr Steven Johnstone, Lawrence Walker Limited,
Church Farm, Leamington Hastings, Warwickshire, C23 8DZ
Contact: 01926 632111 or lwlttd@btopenworld.com

Sustainable travel benefits

Bloor Homes are committed to encouraging sustainable travel at the Normandy Fields development. This travel guide is provided as part of the Normandy Fields Travel Plan which has the following key objectives.

1. To deliver a target Single Occupancy Vehicle (SOV) modal share of 61% of trips generated by the development, a 15% reduction compared with the current situation in the nearby wards;
2. To promote walking & cycling as the primary means of transport;
3. To promote bus travel as the secondary means of reducing the use of the private car;
4. To increase levels of car sharing;
5. To promote home working as a means to reduce the need to travel.

We will be undertaking annual surveys of all households at Normandy Fields to monitor progress towards these objectives.

Other Benefits

- Saving you money
- Helping the environment
- Improving your health

Local Amenities

Education

1. Battling Brook Primary School **
2. Redmoor Academy***
3. Richmond Primary Academy ***
4. Bright Horizons Hinckley Day Nursery and Pre-school ***

Walking

Normandy Fields

Walking is a healthy enjoyable way to get around that can be part of a daily routine for many people, and of course, it's completely free!

Convenient pedestrian routes

Footways and footpaths in the area are well-lit, providing safe and convenient access to your nearest facilities at all times of day.

Leicestershire County Council provides further information on walking in the local area, including, information on rights of way, guided walks, country parks, nature reserves, green spaces and much more.

Quick Facts

According to the Health Education Authority, 'Walking briskly for half an hour a day can halve the risk of heart disease'.

You could do this simply by walking 1200m (3/4 mile) a day to and from your destination instead of taking the car.

For more information visit their website using the link provided below:

www.choosehowyoumove.co.uk

Convenient Pedestrian Routes

Did you know that a walk of just 15 minutes provides children with half of their recommended daily exercise and can help them to be more alert in the classroom?

If you want to avoid the school run nightmares, check with your local school to see if they have a **Walking Bus**, **Park and Stride** or a **WOW scheme** all of which are supported by Leicestershire County Council.

A **Walking Bus** is a group of children walking to school with one or more adults. It can be as informal as two families walking together or a larger organized group.

Park and Stride schemes make use of a parking area 5 or 10 minutes away from school. Parents and pupils who can't walk the whole distance to school can park and complete the journey on foot.

The **Walk Once a Week (WOW)** programme, available in participating schools, encourages and rewards students that walk to school at least once a week! Contact your local school to see if they participate in any of these programmes.

For more information on walking to school schemes please visit the link below and find active groups near you.

<https://www.leicestershire.gov.uk/education-and-children/school-transport>

Further information on personalised walking route planners and how you can get involved in your local walking community can be found at:

<https://www.walkingforhealth.org.uk/>

<https://walkit.com/>

<https://www.ramblers.org.uk/>

Cycling

Normandy Fields

Whether you want to improve your fitness, do your bit for the environment or have a little fun with your family, pedal power is the way forward. It could also save you time and money. Cycle maps and information on the trails across Leicestershire are available to download from the **Choose how you move** website (see below), as well as numerous leisure routes and connections to the National Cycle Network (NCN).

To encourage cycling for journeys to work and leisure, Leicestershire County Council also provides information on route planning and cycle safety through the website **Choose how you move**. There is information on a range of cycling clubs, charities and new cycling facilities.

A wealth of advice and information is available from Sustrans, a UK cycling charity that looks after the National Cycle Network. Topics range from bike maintenance to cycle training and even scootering tips. Access to the NCN map is also available from their website.

www.sustrans.org.uk

www.letsride.co.uk

www.choosehowyoumove.co.uk

Cycle Training

Leicestershire County Council supports cyclists through training, advice, information and events. Professionally trained instructors are employed by the Council to provide level 3 cycle training. This type of cycle training offers children an opportunity to upgrade their skills and confidence following the National Standard scheme.

Further information about cycle training can be found on Leicestershire County Council's designated cycle training website or by telephone.

www.tjunction.org.uk/bikeability/

Tel: 0116 305 7233

Cycle to work schemes

You can get help to buy a new bicycle or accessories using the 'cycle to work scheme'. Ask your employer to sign up or for more details, visit www.bike2workscheme.co.uk

Quick Facts

According to the British Medical Association, 'Cycling just 20 miles per week halves the risk of heart attack'. This would be equivalent to cycling to and from your workplace two miles away, five days a week.

Take the Bus

Normandy Fields

Service number	Operator	Nearest Stop	Key destination
48 Gold	Stagecoach	Harrowbrook Road	Coventry—Hinckley—Leicester
67	Arriva	Lowton Close	Hinckley—MIRA Technology Park—Nuneaton
66	Arriva	Henry Street (Wykin Road)	Hinckley—Stoke Golding—Dadlington—Nuneaton
7 & 7A	Arriva	Lowton Close	Burnage—Nuneaton
158	Arriva	Harrowbrook Road	Leicester—Nuneaton

Within easy reach of your home are 5 bus services, providing access to Hinckley town centre, Nuneaton, Leicester and Coventry.

The closest bus stop is at the corner of Wykin Road and Henry Street, to the north and east of the development (around 8 minute's walk) and is served by the 66 bus service from Nuneaton to Hinckley. This service is available from Monday to Saturday with services running at a frequency of one per hour.

Bus routes 7 & 7A provide the most frequent service to Hinckley town centre, running at up to 2 buses per hour, Monday to Saturday. These services can be accessed from Lawton Close (around a 12 minute walk).

Bus services from Hinckley can be used to access a wealth of employment and leisure opportunities in Hinckley, Leicester and Nuneaton. For longer distance travel, they can be used to reach Hinckley train station, where regular trains to Leicester and Birmingham New Street operate.

Bus fares

Taking the bus is an affordable way to travel, with many ways to make savings on a day trip or regular journeys. All commercial bus operators in Leicester and Leicestershire offer a range of multi-journey saver tickets.

Arriva (Leicester Zone Two)

- Leicester Adult Day - £4.30
- Leicester Adult Weekly - £16.50
- Leicester Adult Monthly - £60.00
- Leicester Adult Year - £600.00
- Leicester Family Day - £9.00
- Leicester Child Day - £3.50

(Fares current from March 2019)

www.arrivabus.co.uk/midlands

www.choosehowyoumove.co.uk/everyday/public-transport/

Take the Bus

Normandy Fields

Want more bus information?

Leicestershire County Council has a web page dedicated to bus travel.

www.leicestershire.gov.uk/roads-and-travel/buses-and-public-transport

where you can find additional information on:

- Planning your bus journey
- Bus service changes
- Bus service operator details
- How to apply for concessionary bus passes

Journey planning

Want to know when your next bus is? If you have internet access, Traveline can help. You can access bus information via the website or smartphone app.

www.traveline.info

Alternatively you can use Leicestershire County Council's own online journey planning tool - Choose how you move.

www.choosehowyoumove.co.uk

Do I qualify for a free bus pass?

Free off-peak bus travel across England is available if you are eligible to apply.

What categories of disability qualify for a disabled pass?

You may be eligible for a free bus pass if your disability is included in one of the following categories;

- Blind or partially sighted
- Profoundly or severely deaf
- Without speech
- Permanent severe walking difficulty
- Without the use of both arms
- Learning disability which includes significant impairment of intelligence and social functioning
- Refused a driving license on medical grounds

Leicestershire County Council also provides free bus passes for the elderly. Visit the County Council's website to check if you qualify for an older person's pass.

Website:

<https://www.leicestershire.gov.uk/roads-and-travel/buses-and-public-transport/older-persons-bus-pass>

Tel:

0116 305 0002

Catch the Train

Normandy Fields

The nearest Railway Station to Normandy Fields is Hinckley, which is approximately 3.5km from the site by road and is thus within easy cycling distance. The station is served by Birmingham New Street to Leicester services, most calling at Nuneaton and Coleshill (towards Birmingham) and at Narborough (en-route to Leicester). Journey times by train are approximately 39 minutes to Birmingham and 19 minutes to Leicester.

Hinckley station can be accessed directly using the 66 bus service.

Hinckley PLUSBIKE

PLUSBIKE provides easy free information to help your combined cycle and rail journey. Hinckley Railway Station is a PLUSBIKE station with 16 bicycle storage units available.

Rail cards

To save money, you can buy a range of national and regional rail cards, for just £30.00 per year.

- **16-25** (+ mature students)
- **26-30**
- **Two together**
- **Family & Friends** (up to 4 adults and 4 children travelling together)
- **Senior** (over 60s)

For more information and additional discounts, check out www.railcard.co.uk

or call 0345 3000 250

Have a disability?

Don't worry - National Rail can help! Assistance is available to passengers with disabilities, including wheelchairs and luggage carrying.

If you need extra help at the station it's best to book at least 24 hours in advance.

To find out more, call:

0800 092 4260 or textphone 0344811 0134

Journey planning

You can download a National Rail smartphone app for Android or iOS, allowing you to plan your journey in advance and even buy your ticket! If you don't have a smart phone, everything you need to know is on their website.

Visit: www.nationalrail.co.uk or

call: 03457 48 49 50

Leicester PLUSBUS

A Leicester PLUSBUS ticket can be used as part of your train journey and allows unlimited travel on bus services run by participating operators around Leicester city. Day tickets cost £3.50 for adults and are available online or from the railway station. For more information visit: www.plusbus.info/leicester

Car Sharing

Normandy Fields

What is car sharing?

Car sharing is when two or more people arrange to share a car and travel together instead of driving alone.

Liftshare.com

Liftshare.com is a free database that aims to connect potential car share partners who want to make similar journeys at the same time of day.

It's as flexible as you need – share as often or as little as you want!

It's simple and free to join and there's no obligation once registered.

For more information and details or to find how much you could save, use the web link below, or search “Car Sharing”.

www.liftshare.com

www.choosehowyoumove.co.uk/carshare

Shared mobility / Car clubs

Shared mobility means using car club cars, 2+ car sharing, shared bikes and public transport. It can be a viable alternative to owning a car.

Many people do not make a regular trip by car, and the costs of owning and maintaining a vehicle can be increasingly expensive. By replacing one or more of your family cars with a Car Club membership you could make significant savings while still having access to a vehicle when you need one.

Organisations such as **Como UK** promote car clubs and shared transport. If you want to find a car club near you visit:

www.como.org.uk

There are also Enterprise Car Club vehicles at various locations around the UK.

For more information on car clubs near you, visit:

www.enterpriseclub.co.uk

Quick Facts

The use of car sharing schemes by commuters reduces the number of single—occupancy cars on the road.

This helps reduce congestion, air pollution and parking problems. It also saves you time and money, and even the need to own a car at all.

bloorhomes.com
