Supporting Statement –

Hinckley Family Contact Centre

The modular building currently in situ at the Hinckley Family Contact Centre is to be externally clad in brick slip panels, to match as far as possible the existing building which the modular building is abutted to.

‘The contact centre is one of three centres in Leicestershire that serve the whole of the Leicestershire area. It is used Monday to Friday during the working day and occasionally in the evening to allow case conference and family meetings. The centre provides much needed meeting space for children in care to meet their families and space for court supervised meetings to take place also. The centre is also used to carry out family assessments.

The centre is a much needed resource to help families across Leicestershire. Without the centre the families who currently use it will have to travel much greater distances to alternative sites, the building is DDA compliant and on a practical not it provides toilet facilities for the adjacent buildings.’
