Design and access statement for Sapcote Road Industrial estate

Design

We have designed the building to maximise the space to fit 2 industrial units, for the ease of access to the building each one will have a roller shutter door and a personnel door going into the building. The building will be of natural colours to suit the surrounding buildings.

Access

Access will not alter as there is sufficient access off the sapcote road into the industrial estate. There will be no increase in traffic entering or leaving the site. There has been no problems in this site entrance with congestion or accidents.
