Traffic plan

Following your report on Part Unit 1, Sapcote Road Industrial Estate, Burbage, Hinckley I have completed a parking layout drawing showing where both the cycle spaces and the car parking space are located.

There is a bus stop located within 100 meters of the site on the Sapcote Road. We will encourage operatives from the site to use the local bus services to and from work. We will also be supplying seven cycle spaces marked green on drawing no 1052 102 A to encourage people on site to cycle to work rather than drive. With the site being close to the centre of Hinckley and Burbage this is a viable option, many of the operative's cycle to work and this will only encourage others to do the same.

There will be four car parking spaces for these unit located to the left of the units, the size of the spaces will be 6100 x 2400 and will leave a gap in between them of 4220. These are marked red on drawing no 1052 102 A, The vehicles which are currently using this site as a parking area will have there own spaces allocated to them, this will be located to the south of the site within the area which Multidoors vacates.
