Informative recommended	
SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:	
Applicant submitted information: Existing and Proposed Site Elevations, Site Location Plan, Proposed Layouts, Proposed Visuals, aerial photos	
REASON FOR RECOMMENDATION PROVIDED:	
- The proposed development consists of extensive alterations of the roof and the overall dwelling, including new render and the addition of dormer windows. Surrounding the dwelling there is good habitat connectivity to arable land, mature trees and nearby watercourses. As such, this habitat could provide suitable foraging and good connectivity routes for bats. - The works involve significant alterations to the existing roof, tiles and roof line of the dwelling, all of which may provide access and suitability for roosting bats. - Therefore, the submission of a Preliminary Roost Assessment (PRA) will be required on the existing dwelling prior to commencement. The survey will need to be carried out by a suitably licenced ecologist and can be carried out at any time of year. The PRA should include internal and external photographs. - I have a holding objection until this is supplied.	
BIODIVERSITY NET GAIN (BNG) SPECIFIC COMMENTS:
