Comments:
Owing to the change of indicative site layout plans I have been consulted again on this application. The plans now show an increased allocation to industrial use on the site. This in turn will move the potentially noisy activity closer to more houses on the site than previously considered. The noise report will need further consideration on this matter but I feel that my initial comments and subsequent communication with the developers noise consultant which was copied to Phil Metcalf, adequately covers this.

The reason for the above comments is to ensure that the development does not have an adverse impact on the amenities of surrounding properties (existing and proposed) in terms of noise.
