Re: reinstatement of levels post World Moto-X event

Spoke to Richard Hillier and he is finalising the remaining outstanding details in relation to the creation of the bunding and works associated with the motocross track.

A concern is that the site should be reinstated to its original state once the event is over. As part of the application Richard Hillier has plotted the original levels before work began on the course. This will allow a condition to be applied to the permission requiring the reinstatement of the spectator area and track to be confined to its existing size and location.
