

Barrow Hill Quarry Discharge of conditions note

This note relates to the following conditions:

Condition 7 – Waste and Recycling:

Drawing numbers 1001E and 1003A indicate the location and siting of waste and recycling facilities (a bin store) for the proposed development. The site would utilise a weekly commercial waste and recycling service.

Condition 11 – Materials:

Drawing numbers 1001E and 1003A indicate the proposed external elevations for the proposed lodges and management building. The walls would be treated timber and the rooves would be grey cladding as indicated.

Condition 14 – E V Charging:

Four EV charging points would be provided adjacent to the management building. The lodges are not required to provide individual EV charging under Building Regulations and accordingly 'communal' provision for visitors is appropriate.
