

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

1.2 Planning application reference number

1.3 Local planning authority (LPA)

Hinckley & Bosworth Borough Council

1.4 Development site address

If the site does not have an address, enter the OS grid reference.

Hall Farm, 1 Main Street, Dadlington, Nuneaton CV13
6HX

1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

Proposed erection of one holiday letting unit and associated access and landscaping.

2. Developer details

2.1 Applicant name

2.2 Company name

2.3 Address

2.4 Email address

2.5 Telephone number

2.6 Declaration

By signing this declaration, you confirm that the information you give is complete and correct. Any opinions are your genuine opinions.

2.7 Signature

2.8 Date

3. Responsible person details

Tell us about who is responsible for completing the biodiversity gain plan. For example, a consultancy ecologist or planning agent.

3.1 Name

Dom Riley

3.2 Company name

Croft Ecology

3.3 Address

43 Sparkenhoe
Croft
Leicestershire
LE9 3EP

3.4 Email address

dom@croftecology.co.uk

3.5 Telephone number

3.6 Declaration

By signing this declaration, you confirm that the information you give is complete and correct. Any opinions are your genuine opinions.

3.7 Signature

Ⓟ Riley

3.8 Date

03.12.25

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

No other schemes are counting to the BNG, only the on-site development

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

There are no irreplaceable habitats within the site.

Development is already partly focused on areas of low distinctiveness habitat (modified grassland) and an area scoring zero on the BNG metric (unsealed surface), with a portion of medium distinctiveness habitat – other neutral grassland - being affected by the works. A large extent of the other neutral grassland has been deliberately retained as part of the proposals, which will be improved in condition to compensate for the losses.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes

☐ No

4.6 How will you achieve the target net gain percentage?

☒ On-site

☐ Off-site

☐ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

0.0337ha of neutral grassland located in the north of the Site is to be enhanced from its current poor condition to moderate condition. This will be completed by relaxing the mowing regime, and applying a sowing a wildflower mix such as EM2 Standard General Purpose Meadow Mixture. Management of the other neutral grassland will aim to achieve a grassland of moderate species diversity with a varied sward height, low levels of bare ground, limited bracken and scrub encroachment, and limited species indicative of suboptimal condition. Management should take the form of no strimming during the growing season (March-July) but a short area i.e. 20% under 7cm will always be retained. A hay cut should then be taken in late July/early August with arisings removed. This will ensure that the necessary conditions for moderate are met and hence improve the condition of the habitat.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

n/a

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

n/a

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

n/a

4.12 Do you have a habitat management and monitoring plan?

☐ Yes

☒ No

4.13 Have you used the statutory biodiversity metric tool?

☒ Yes

☐ No

4.14 Biodiversity metric calculation

Send your biodiversity metric calculation to the LPA and enter the file name.

HallFarm.BNGMetric.v1.xlsm

4.15 Condition assessments

Send your condition assessments to the LPA and enter the file name.

HallFarm.CondAssts.pdf

HallFarm.CondAssts2.pdf

4.16 Pre-development habitat survey report and map

Send your baseline habitat survey report and map to the LPA. Enter the file name.

HallFarm.BNGTechNote.v1.pdf

4.17 Post-development habitat map or landscape plan

Send your post-development habitat survey report and map to the LPA. Enter the file name.

25 79 03B – As Proposed Site Plan – Scheme 02 – Sept 2025.pdf

4.18 Have you included an approved habitat degradation in the baseline?

If yes, include the relevant consenting body and reference number.

☐ Yes

☒ No

Consenting body

Reference number

5. Irreplaceable habitats

5.1 Does the development impact any irreplaceable habitats?

If yes, tell us if you've submitted an approved compensation plan.

☐ Yes

☒ No

5.2 Have you submitted an approved compensation plan?

☐ Yes

☒ No

6. On-site habitat enhancements

Answer this section if your development includes on-site habitat enhancements.

6.1 Survey date

For example, 3/11/2023

08.05.25 & 16.11.25

6.2 Survey constraints

For example, access issues, weather, or seasonal constraints.

Two surveys were conducted as the red line boundary changed between the two visits. The first site visit in May did not include the access drive or the verge next to it, but these areas were surveyed in November.

6.3 Total pre-development biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.

Number of area habitat biodiversity units

0.22

Number of hedgerow biodiversity units

0

Number of watercourse biodiversity units

0

6.4 Total post-development biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.

Number of area habitat biodiversity units

0.25

Number of hedgerow biodiversity units

0

Number of watercourse biodiversity units

0

6.5 Total net change in biodiversity units

Enter the number from the headline results in your statutory biodiversity metric calculation.

6.6 Will you register and allocate any biodiversity units from your site to other developments?

If yes or provisionally, give details.

☐ Yes

☒ No

6.7 Give details

Tell us about the amount of biodiversity units and the development location (250 words).

7. Off-site habitat enhancements

Answer this section if your development includes off-site habitat enhancements.

7.1 Tell us about the off-site habitat enhancements

Include whether you're delivering the off-site enhancements or buying biodiversity units.

n/a

7.2 Biodiversity gain site register reference number

n/a

7.3 How have you secured the off-site habitat enhancements?

Tell us about any responsible bodies and whether you've used an S106 or conservation covenant.

n/a

7.4 Total baseline biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.

Number of area habitat biodiversity units

n/a

8. Statutory biodiversity credits

Answer this section if you need to use statutory biodiversity credits.

8.1 Do you need to use statutory biodiversity credits?

☐ Yes

☒ No

8.2 How many statutory biodiversity credits do you need?

Tell us the unit shortfall by tier, including the spatial risk multiplier. Enter the number from the headline results in your statutory biodiversity metric calculation.

A5

H

W

8.3 What evidence is there that no units are available through the market?

Send a message from at least 3 habitat providers, or a search result from online registers.

8.4 Proof of purchase

Send proof of purchase and enter the reference number.

9. Trading summary

9.1 Distinctiveness group

Tell us if you met the BNG trading rules on habitat compensation for each distinctiveness group. If you did not meet the trading rules, tell us if you agreed bespoke habitat compensation.

Check the rules on habitat compensation in the [statutory biodiversity metric user guide](#).
