Comments

Submission Type:

Comments:
I have no objections in principle to the increase in tents but the following does concern me and would like some clarification in the design and access statement or supporting statement for the following:

1. How will or is security managed on site to protect the tents and facilities during closed periods or periods of unoccupancy.
2. How is security managed or what procedures are in place to protect users of the facilities during occupancy i.e. in the event of any crimnal activity that occurs (assault, abuse etc).
3. The line of the public right of way cuts through the car parking area. What mesures are in place to proetect cars from damage, theft, vandalism in the event that this could take place from users of the footpath.

Many thanks.
