Landscaping
Ref: 0007

The subject property is built to its site boundaries and therefore does not require any landscaping as such.

Parking Provision
Ref 0006

The subject property has one allocated parking space in a communal area. It is my clients proposal that this parking space is not used as part of the development and the use of public transport is encouraged. There are a number of public car parks within close proximity to cater for the parking provision of vehicles.
