Application to reduce the Three Trees by 25%

We moved into 2, Quarryman's Court seven years ago and we obtained permission to take out all the dead wood at that time

Over the seven years the trees have grown and we feel that the time has come to now reduce the overall height and width of the trees

We now wish to reduce the height and width of the three trees to allow some light onto the garden and to reduce the risk of one of the trees becoming unsafe because eof the weight on one major branch

The trees are silver birch trees and we understand that these trees have a limited life span
