Pre Application Advice. DISCONS

once the planning permission had been Applied for Giles Rawdon from environmental health contacted me, we arranged a site visit.
Giles looked at our current arrangements and the building to be converted and advised the fitting of a noise limiting device, to which he posted me a list of approved suppliers. the next day.
with this I ordered a NWX Noise limiter from Lime Technologies.
The Electrician (Jonny Adock) fitted this along with all the other electrics whilst the barn was being converted.
In mayll Lee Dolman made me aware of a noise complaint, as part of his investigations, he visited the site to ensure a noise limiter was fitted, then came back later with Giles and adjusted the unit whilst Giles was in the complainants house Lee then sealed the box (see attached photo).
I have included all the info from Lime Technologies and photos of this in situ.

Regards
