Dear sir/ madam

Further to our numerous attempts to get in touch with your department regarding the planning application for the above address in the position for having to formally write to you with the request that you contact us within the next three days so as to advise us of the progress of the application.

After the initial rejection of the planning application a meeting was arranged so that we were able to conform with your requirements as to the size and orientation of the extension and we were informed in that meeting that if we complied that the application would be passed, and we also received a call from Eleanor Shaw to say that she had received the plans, that they were ok and that they were to be passed that week. This however was over six weeks ago and as stated all attempts to contact your department have been ignored.

We do not find this situation very satisfactory as we have had to pay for the approval process upfront and it appears that the planning department is being as obstructive as possible.

It should also be mentioned that we have been advised to take this matter to our local councillor but we would rather pursue a reasonable conclusion with your department before having to take further steps

Regards

Martin Gandy
