Richard,

I am happy to give my consent for the ground risk assessment reports already submitted and the therein contained (and already approved by HBBC) proposed schemes of land assessment and, should it be required, remediation to be used to condition Mr. & Mrs. Sutton's current application (11/00818/FUL) on my land at Sycamore Farm.

Kind regards,

Frank Brogan

Richard,

Further to our telephone conversation I woul appreciate it if you could transfer the discharge of conditions details already submitted as part of planning permission 08/01001/FUL to be included in the extension of time application and reword each of the conditions to require the development to be implemented in accordance with the specific details submitted. This would then remove the need to discharge the conditions again but would restrict the development to those specific details

Thank you,

Frank Brogan
