Proposed work to tree:

Fell eucalyptus tree in south east corner of garden (ref. T1,Maple-Eucalyptus in attached plan). No TPO in place. Trunk diameter is approximately 12.1cm at 1.5m height from ground.

Reasons:

1. Trunk is unattractively twisted (see photograph).

2. There are 2 further large trees in a small space (approx 10mx10m garden), see plan: T2,Maple-ScotsPine and T3,Maple-Holly.

3. Light will be reduced further when the eucalyptus grows.
