Comments:

Our Ref: NX/INF/LOC/1410.70 (KG)

Dear Sir,

Our field by field records indicate that the southern most field of the application site has previously been evaluated as being of Parish level ecological importance. We would therefore recommend that this change of use does not impact upon the management/mowing routine of the site, as it may be that this area is still ecologically important.

Provided that the management of the site is not changed, we have no comments on this application.

We hope that our comments and recommendations will be of use to you.

Yours faithfully

Kirsty Gamble
Planning Ecologist
Historic and Natural Environment Team

Please note: Our information and recommendations result from our best knowledge of the site to date. It may change if further information is discovered. It remains the responsibility of the applicant to ensure that no protected species or their habitat is damaged during the works. The best method of achieving this is for a suitably experienced and licensed ecologist to conduct a full survey for protected species at the appropriate time of year in appropriate weather conditions.
