

CONSULTATION TEMPLATE RESPONSE FROM LEICESTERSHIRE COUNTY COUNCIL:

ECOLOGY AND BIODIVERSITY PLANNING ADVICE

COUNTY, DISTRICT OR BOROUGH	Hinckley and Bosworth Borough Council
APPLICATION NUMBER	26/00560/HOU
ADDRESS	21 Andrew Close Stoke Golding Nuneaton Leicestershire CV13 6EL
DESCRIPTION OF DEVELOPMENT	Erection of a two-storey rear extension, together with the installation of conservation style Velux roof windows to the rear roof slope of the loft
PLANNING CASE OFFICER	Gwion Russell
DEPARTMENT	Ecology
PLANNING ECOLOGY OFFICER	Jemma Bett
DATE OF COMMENTS	15 July 2026
ECOLOGICAL DOCUMENTS REVIEWED:	
• n/a • Plans - 25001-WH-21-XX-DR-X-1002 – P01 (June 2026) • Existing Plans - 25001-WH-21-XX-DR-X-1003 – P01 (June 2026) • Proposed Plans - 26001-WH-21-XX-DR-X-1004 – P01 (June 2026)	
SUMMARY RECOMMENDATION:	
No comment	
No objection (for recommended conditions or informatives- see below)	
Recommend Refusal	
Holding Objection - Further information required	✓
REASON FOR RECOMMENDATION:	
• The proposed works consist of the erection of a two-storey rear extension, installation of roof lights and landscaping works. Sited within a semi-rural area, adjacent to agricultural fields and mature hedgerows extending out into the wider landscape and nearby watercourses, such as Ashby de la Zouch canal towards the north. Therefore, the nearby surroundings offering suitable commuting and foraging habitat for protected species. • Bats are particularly associated with the roof structures of buildings including gables, eaves, soffits and flashing, but may also be present in crevices such as stone, brickwork or cavity walls. The proposed works include alterations the roof structure, affecting any roof voids, eaves, fascias, soffits and tiles, all of which may provide access and suitability for bats.	

- As such, given the nature of the works and suitability of the surroundings, a Preliminary Roost Assessment (PRA) is required to assess the building for potential bat roosting features and nesting birds.
- The PRA can take place any time of the year. This must be completed by a suitably licenced ecologist and the Natural England bat licence reference number of the surveyor(s) be provided.
- Scope of the ecological survey (but is not limited to):
 - Internal and external inspection of the existing building
 - Photographs of any potential roost features (PRFs), with locations clearly marked on annotated images showing the entire building and cardinal directions. Layout of the roof void marked on an annotated illustration or a roof plan, including any separations (clearly labelled, e.g. roof void 1a, 1b, 1c)
 - Clear justification regarding the assessment of the structures roosting potential (negligible, low, medium, or high) and recommendations for any further surveys.
 - Identification of habitats onsite that may support protected species and assessment of any likelihood of direct or indirect disturbance.
 - Details of any proposed mitigation, licensing requirements or enhancement measures for protected species.
- Enhancements: In line with the National Planning Policy Framework (NPPF), the application must demonstrate measurable net gains for biodiversity. The ecologist should recommend enhancements such as bat and bird boxes, specifying the make/model and location, and include these on annotated images or elevation plans.
- We have a holding objection. Please note that ODPM Regulations require protected species surveys to be submitted prior to determination of a planning application.
- It should also be noted that historical records confirm the presence of a breeding Great Crested Newt (GCN) pond within 200m of the site and history of badger setts nearby. Accordingly, the following informatives should also be attached to any permission.

ANY RECOMMENDED CONDITIONS TO BE APPLIED:

-

ANY RECOMMENDED INFORMATIVES TO BE APPLIED:

- A badger sett is defined by law as 'any structure or place which displays signs indicating current use by a badger'. Under the Protection of Badgers Act 1992 it is an offence to: Take, injure, or kill a badger (or attempt to do so); Cruelly ill-treat a badger; Intentionally or recklessly damage, destroy or obstruct access to a badger sett; and intentionally or recklessly disturb a badger when it is occupying a badger sett. Therefore, no works should occur near to a badger sett unless carefully checked beforehand by a suitably qualified person.
- Great Crested Newts, a species fully protected by law, are known to breed in a pond within 200m of the proposed development, therefore there is a small possibility that a newt, or small numbers of newts could be present on the site. The applicant should therefore exercise due care during implementation of the proposed development, ensuring that all contractors are aware of the possibility of finding great crested newts, and stored materials are carefully removed by hand. Work should cease if a great crested newt is found, and advice from a licensed ecologist should be sought

IN THE CASE OF DISCHARGE OF CONDITIONS ONLY:

(Please confirm which condition(s) is/are being discharged)

•

Note for applicants: Please be aware that this advice is provided to the Local Planning Authority through a Service Level Agreement between the Local Planning Authority and Leicestershire County Council Ecology Team. Its purpose is to discharge the legal duties of the determining authority under The Local Authorities (Functions and Responsibilities) Regulations (2000), Regulations 4.

If you have any queries about the content, please correspond directly with the Planning Officer assigned to the planning application or discharge of condition application. We are unable to respond directly to applicant enquiries regarding the advice that we have provided to the determining authority.

The following legislation is used to assist in the assessment of planning applications:

Legislation source	Reference
National Planning Policy Framework	Paragraphs relevant to biodiversity, biodiversity net gain, ecological connectivity and protected species
Environment Act 2021	Mandatory Net Gain Biodiversity Duty Local Nature Recovery Strategy
District or Borough Local Plan and supporting SPD's	Local Plan policy
ODPM circular 06/2005: Biodiversity and Geological Conservation	Requirement for species survey work and mitigation recommendations to be carried out prior to the determination of a planning application. Paras. 98 and 99
NERC Act 2006	Biodiversity Duty (see also Environment Act 2021) Section 41, habitats and species of Principal Importance (previously BAP)
Various International, European and National laws in relation to the protection of species and habitats	International and national site protection: Ramsar sites (from Ramsar Convention), Habitat and Birds Directives (Natura 2000 sites include SAC's and SPA's), SSSI's, National Nature Reserves, Local Wildlife Sites, Local Nature Reserves. Habitats and Species protection: Habitat and Species Regulations (protected sites and species). Wildlife and Countryside Act 1981 (as amended including special Schedule 1), Natural England Standing Advice. Badger Act.
