Comments:
It is a criminal offence to damage or destroy a bat roost. Therefore, if the tree is mature and has hollow cavities and / or is covered with ivy, or has suitable places in which bats might roost, we recommend that it be surveyed for bats before any work is carried out to the tree. All birds, their nests and eggs are protected by the Wildlife and Countryside Act. We recommend that work to trees / hedgerows is done outside the bird-nesting season - i.e. between the end of August and beginning of March. If work to the tree is to be undertaken during the bird breeding season, we recommend that a suitably qualified ecologist surveys the tree / hedgerow for nesting birds. If nesting birds are present, work must be postponed until the young have left the nest.
