Description of Proposed Works

Please describe the proposed works

The Proposal

The current homeowner proposes to convert the existing garage into a functional living space, enhancing the dwelling’s usability while maintaining its overall character. Key elements of the proposal include:

- Garage Conversion:
The existing garage doors will be removed and replaced with matching brick infill and new windows. This alteration aims to maintain the visual integrity of the existing elevation while enhancing internal accommodation.
- External Openings:
A side window will be replaced with French doors to improve access and natural light. Two new windows are proposed to match those on the floor above, ensuring architectural consistency.
- First Floor Alterations:
The room above the garage will be converted into a new Master Bedroom, complete with a walk-in wardrobe and ensuite. Internal adjustments, including new partitions and doors, will be made to form these rooms.
- Balcony and Roof Features:
A new oak-framed balcony with glazed balustrade will be added, accessible via the Master Bedroom. This feature enhances the indoor/outdoor relationship, especially in the evening sun. Additionally, a hipped lean-to canopy roof will be constructed over the former garage entrance, in keeping with the building’s character.
