REASON FOR RECOMMENDATION:		
• The proposed works consist of a single-storey rear extension. The site is located within a residential area, with mature trees and gardens in the surrounding area and allotments adjacent to the site. • The proposed plans do not involve any alterations to the existing roof structure, including the roof tiles or roof void. • Therefore, the proposed development is likely to have minimal impact on ecology and no ecological surveys are required. We have no objection. • Given the suitability of the surrounding habitats, the following informative is required to be attached to any permission.		
ANY RECOMMENDED CONDITIONS TO BE APPLIED:

ANY RECOMMENDED INFORMATIVES TO BE APPLIED:		

The property may be suitable for roosting bats, which are protected by law from harm. It is the applicant's responsibility to ensure that bat legislation is not breached. The applicant should ensure that all contractors and individuals working on the property are aware of this possibility, as works must cease if bats are found during the course of the works whilst advice from a bat ecologist is obtained. Bats are particularly associated with the roof structure of buildings, including lofts, rafters, beams, gables, eaves, soffits, flashing, ridge-tile, chimneys, the under-tile area, etc. but may also be present in crevices in stone or brickwork and in cavity walls.
