

PARKING REMINDER

Rectory Gardens was designed to be a vehicle free road and all residents would like to see this maintained. However the temporary loading/unloading of cars is of course permitted.

On the main road there are two cut-ins used as passing places and also for short term loading/unloading; these need to be kept clear for emergency vehicles and manoeuvring, they should not be mistaken for parking spaces.

The parking restrictions outlined apply to all residents and are made clear in the deeds of our houses, in order to maintain a clear, safe through road.

Below is an outline plan showing parking spaces and visitor spaces:

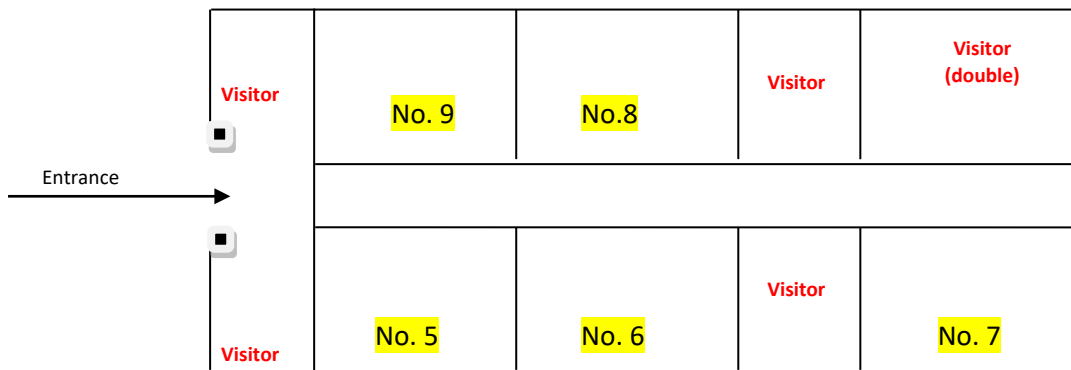

There are **7 visitor spaces** (5 single spaces and 1 double space)

When you receive visitors please direct them to these spaces.

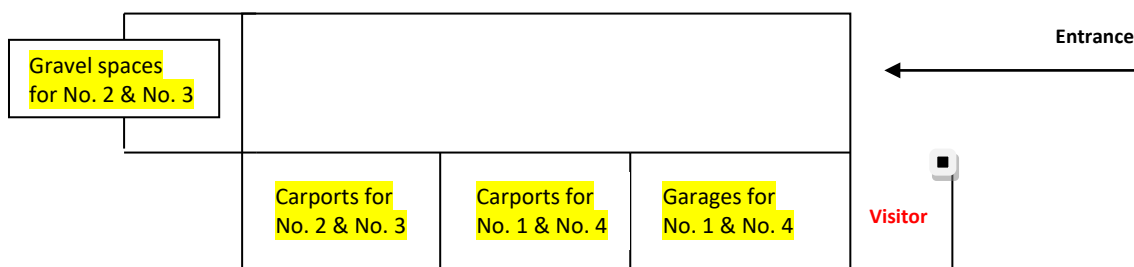

Please do not block access to visitor spaces.

Please note the double visitor space is a double and should be used accordingly.

At the top carport area there are 6 visitor spaces as detailed below:

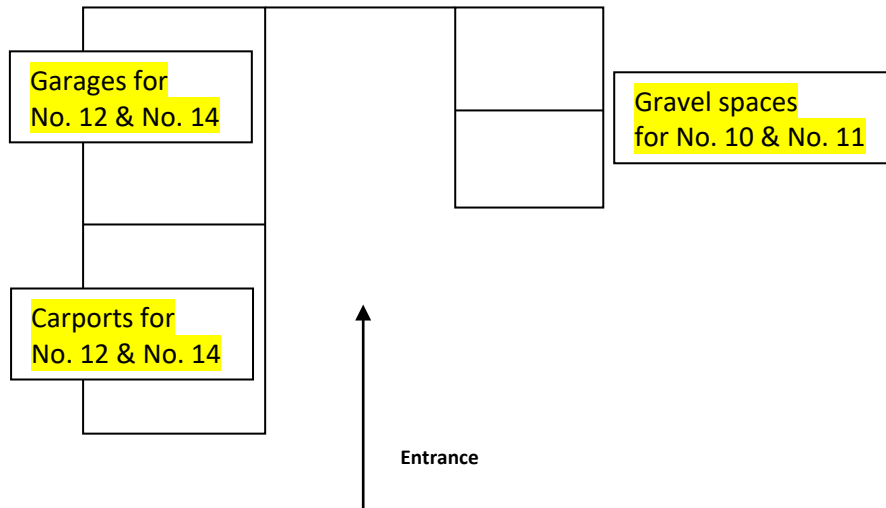

At the left carport/garage area there is 1 visitor space as detailed below:

There are **NO** visitor spaces at the third carport/garage area.
For your information the parking for this area is detailed below:

Please be mindful of the parking restrictions that apply in Rectory Gardens and comply with these wherever possible; be considerate when making use of the visitor spaces, we would all like to see a vehicle free road.

Thank you!
