Ref: DAS0004 – Security Fence Line

Dear Sir/Madam

Subject: Design and Access Statement

On the Caterpillar BCP Desford site, we have a requirement to install a security fence line to prevent intruders & trespassers. This will be stepped into our land by at least 2m along its whole course to provide access from either side for maintenance and installation purposes. It will be made up of a 2.33m height V-Mesh fence, powder coated green RAL 6005. It will be constructed of 3m length panels, postcreted into the ground up to 1m depth. Postcrete will be placed into holes augered 300mm diameter (every 3m along the fenceline). This will generate roughly 270 posts, impacting roughly 19m² of ground space.

Yours Sincerely

Daniel Attwood MEng

Facilities Engineer
