Dear Sir/Madam

Subject: Planning Statement – Security Fence Line

On the Caterpillar BCP Desford site, we have the requirement to install a security fence line to protect our site and the public. There are currently large breaks in any substantial fence around the rear of our site, which are protected only by decaying and collapsing wooden fencing. It has therefore been deemed necessary to replace this fence line to prevent intruders or other members of the public from entering restricted areas. This will consist of ~800m of 2.33m height V-Mesh fencing, powder coated green RAL 6005 as to not impact the view from any road or public footpath. The existing area is taken up by a ~1m height barbed wire and wooden fence along the majority of our site boundary. This makes its way through the wooded area which surrounds the rear of Caterpillar BCP Desford site. Any trees in the vicinity of the new fence will be built around as to ensure a negligible environmental impact. Planning permission has been sought due to the fence exceeding 2m in height.

Yours Sincerely

Daniel Attwood MEng  
Facilities Engineer  
Plant Engineering  
Caterpillar (UK) Ltd
