The replacement trees shall be planted in accordance with the approved details in the next available planting season (October to March).

Reason: To ensure that replacement trees are planted on site in the interests of protecting the amenity of the area in accordance with Policy DM10 of the adopted Site Allocations and Policies Development Plan Document (2016).

NOTES TO APPLICANT :-

- a.) The applicant is requested to note that this permission does not affect any private property rights and therefore does not authorise the carrying out of any work on land outside of their control. If such works are required it will be necessary for the applicant to obtain the landowners consent before such works commence.
- b.) It is a criminal offence to damage or destroy a bat roost. Therefore, if the tree is mature and has hollow cavities and / or is covered with ivy, or has suitable places in which bats might roost, we recommend that it be surveyed for bats before any work is carried out to the tree. All birds, their nests and eggs are protected by the Wildlife and Countryside Act. We recommend that work to trees is done outside the bird-nesting season - i.e between the end of August and beginning March. If work to the tree is to be undertaken during the bird breeding season, we recommend that a suitably qualified ecologist surveys the tree for nesting birds. If nesting birds are present, work must be postponed until the young have left the nest.
- c.) You are advised that the consent is valid for a period of two years commencing from the date permission is granted, the works for this consent may only be carried out once unless stated otherwise by condition.
- d.) It is necessary, when carrying out works to tree(s) to be aware of the WILDLIFE AND

COUNTRYSIDE ACT, 1981, whereby it is an offence for any person who intentionally takes, damages or destroys the nest of any wild bird, while the nest is in use or being built, or takes or destroys any eggs of such.
