Hi David,

The end game I sincerely hope! In summary:

Archaeology - as you see from my preceding mail to Neil at Contour Archaeology, the minor points from William are to be addressed by him. We have established the depth of the natural ground affected, and we have confirmed that Neil will have a watching brief during earthworks, so I think we have done the necessary on this.

CPP update - I attach the updated sketch drawing of the temporary parking with traffic routing and the Contractor's 'holding area' also at the football club, to be included in the updated CPP from Blakedown Contractors (pending). The wheel-washing equipment is to be by pressure washer with runoff from this emptied into the temporary silt pit.

Ecology - A confirmatory report from our Ecologists Whitcher Wildlife is attached, covering the proposed GCN and Badger treatments, with drawing.

Sorry for the drip-feed, but I thought it might help to inch our way there with your report.

Kind regards,

David
