BARNHILLS FARM MERRYLEES ROAD: BIODIVERSITY NET GAIN (BNG) SUMMARY

- i. Based on the masterplan and the scheme of applied biodiversity interventions a BNG has been achieved for area habitats. A summary of the results set out within this assessment and the supporting Statutory Biodiversity Metric calculator tool & figures is provided below.
- ii. The proposed development will result in an overall habitat area unit change of **+0.09**, resulting in an overall net gain of **+12.83%** for area habitats.
- iii. Hedge unit calculation not included as all peripheral hedgerows to be retained at peripheries and omitted from the redline boundary.
- iv. For full calculation details consult the associated Statutory Natural England Biodiversity Metric calculation spreadsheet which was submit alongside this report. QGIS shapefiles can also be provided upon request. Associated figures and pictures are provided at the end of this letter addendum.

TRADING SUMMARY

- v. **The trading rules have been satisfied as part of the assessment which is a key requirement of BNG.** This component of the metric seeks to secures like for like (or better) habitat compensation and enhancement.
- vi. A Habitat Management and Monitoring Plan is recommended to provide prescriptions associated with habitat creation/enhancement, long-term management and monitoring. This should be secured through the planning system by way of a condition if and when a scheme at the Site receives approval. The HMMP should build upon the outline prescriptions set out in this report.

CONCLUSION

- vii. I trust this letter is satisfactory to requirements, if any further information is required do not hesitate to contact me directly.

Joe McLaughlin BSc (Hons) MCIEEM
Director

A UK HAB and BNG condition survey was completed on the 23rd July 2024 by Joe McLaughlin BSc (Hons) MCIEEM. Joe has over 11 years' experience as a professional ecologist, has BSBI FISC Level 4 certification for botanical assessment and is certified to complete MoRPh River Condition Assessment surveys for BNG/habitat Assessments.

All relevant assessment details are set out within these figures or the associated Statutory Metric Calculator (which should be read in conjunction). Photos are also provided of the Site at the end of this document.
