LOW GLARE EXTERIOR WALL LIGHT - DOWNWARD LIGHT - SHIP FUNNEL DESIGN

Three Finishes Available - Black, White or Sand

Product Ref: 51982

Description	More Details	Bulbs	Q & A's
An unusual but attractive, funnel-shaped, wall light reminiscent of the fittings you might find on a ship. Available in either a black, white or sand finish with frosted glass to the underneath. This fitting is great for exterior walls and gives a modern look to a property yet blends in with its surroundings. Measuring 156mm in height, this is a decent size for installation either side of a front door or garage and will provide downward illumination. With an IP44 rating, there is no reason why this could not be used inside the home and is suitable for use in a bathroom. The sharp, simple and well-crafted fitting would compliment both modern and classical arcitechture and interiors. Designed for use with a GU10 base lamp up to a maximum of 28 watts.
