Dear James

Re: Market Bosworth Rugby Club

Further to our conversation, please find below and enclosed the further information you requested in support the planning application.

1. Light to windows calculations at 1.5 metres above ground level for both The Lodge and The Gatehouse. You will note that the actual amount of light from the floodlighting system that would spill onto these properties is between 0.41 and 0.62 lux.

2. Project reference sheet. If you wish to visit an existing Musco installation then please contact me and I will make arrangements with the relevant club.

3. Project photographs taken by our head office marketing department showing how well we can control light and avoid spill light.

4. Photographs of Shamrock Rovers Football Club in Tallaght, Ireland. This project is lit to 1200 lux and is situated next to a main road. Again, this demonstrates that we can control spill light. Market Bosworth Rugby Club are requesting 100 lux for training.

5. The club do not intend to use the lighting system after 21.30 on weekday evenings and will not use it at all at weekends.

Registered in England 2935540.
Registered Office: 7 Pilgrim Street, London EC4V 6DR

6. Examples of light levels. Street lighting – approx 88 lux, car park lighting 25 lux

If you need any more information please give me a call.

Yours sincerely

Julie Geddes
Operations Manager
