SUMMARY OF ECOLOGICAL DOCUMENTS CONSIDERED:		
The proposed development consists of a small extension to accommodate a lift, located on the side of the existing building and will tie into a small section of the existing roofline.		
REASON FOR RECOMMENDATION PROVIDED:		
- It is sited within a relatively urbanised area, with mature trees present in the surrounding gardens. - Nevertheless, there seems to be limited connectivity to the wider environment. Therefore, the proposed changes are likely to have minimal impact on ecology and no ecological surveys are required. - However, please see the below recommended informative.

RECOMMENDED CONDITIONS TO BE APPLIED:
•
RECOMMENDED INFORMATIVES TO BE APPLIED:
The property may be suitable for roosting bats, which are protected by law from harm. It is the applicant's responsibility to ensure that bat legislation is not breached, and therefore may need to consult with a licenced bat ecologist prior to commencement to ensure that bats will not be impacted by the works. The applicant should ensure that all contractors and individuals working on the property are aware of this possibility, as works must cease if bats are found during the course of the works whilst advice from a bat ecologist is obtained. Bats are particularly associated with the roof structure of buildings, including lofts, rafters, beams, gables, eaves, soffits, flashing, ridge-tile, chimneys, the under-tile area, etc. but may also be present in crevices in stone or brickwork and in cavity walls.
RECOMMENDED SECTION 106 REQUIREMENT (standard clause, contribution amount, trigger for payment)
•
DISCHARGE OF CONDITIONS ONLY: (Please confirm which condition(s) is/are being discharged)
