

CONSULTATION TEMPLATE RESPONSE FROM LEICESTERSHIRE COUNTY COUNCIL:

ECOLOGY AND BIODIVERSITY PLANNING ADVICE

COUNTY, DISTRICT OR BOROUGH	Hinckley and Bosworth Borough Council
APPLICATION NUMBER	25/01157/OUT (Reconsultation)
ADDRESS	Land Opposite Industrial Estate Hill Lane Markfield Leicestershire
DESCRIPTION OF DEVELOPMENT	Outline planning permission for the erection of up to 67 dwellings (All matters reserved except for access)
PLANNING CASE OFFICER	Matt Jedruch
DEPARTMENT	Ecology
PLANNING ECOLOGY OFFICER	Olivia Larter
DATE OF COMMENTS	1 May 2026
ECOLOGICAL DOCUMENTS REVIEWED:	
• Ecological Impact Assessment (Tyler Grange, November 2025) • Response to Ecology Consultation (Tyler Grange, March 2026) • Appendix 4: Confidential Badger Appendix (November 2025) • The Statutory Biodiversity Metric – Calculation Tool (Revision A) (March 2026) • Statutory Metric Condition Assessment Sheets (September 2025)	
SUMMARY RECOMMENDATION:	
No comment	☐
No objection (for recommended conditions or informatives - see below)	☒
Recommend Refusal	☐
Holding Objection - Further information required	☐
REASON FOR RECOMMENDATION:	
We have reviewed the additional documents submitted relating to the likely impacts of development on bats, European Protected Species, and mandatory Biodiversity Net Gain. We are now satisfied that there is sufficient ecological information available to support determination of this application. We acknowledge that the Response to Ecology Consultation (Tyler Grange, March 2026) provides an update assessment of the buildings and trees to be impacted by the proposed development and concludes that these offer negligible suitability to support roosting bats. Therefore, no further surveys or mitigation is required. This provides certainty for the LPA of the likely impacts on designated sites, protected and Priority species & habitats and, with appropriate mitigation measures secured, the development can be made acceptable.	

The mitigation measures identified in the Ecological Impact Assessment (Tyler Grange, November 2025) should be secured by a condition of any consent and implemented in full. This is necessary to conserve and enhance protected and Priority species particularly those recorded in the locality.

We support the outline mitigation strategy detailed in the Appendix 4: Confidential Badger Appendix (November 2025). A detailed Badger Mitigation Strategy should be detailed within a Construction Environmental Management Plan (CEMP) for biodiversity and secured as a condition of any consent. This will include the requirement for a pre-works badger check and the requirement for a Natural England Interference licence to be obtained for any works proposed within the vicinity of the setts (30m) which could cause disturbance. The CEMP should also detail protection measures for retained habitats and for adjacent Hill Hole Meadow LWS and Hill Hole Quarry LWS and further nearby LoWS designated sites, control of lighting during construction, and detailed precautionary measures for species comprising amphibians and hedgehog as outlined in the Ecological Impact Assessment (Tyler Grange, November 2025).

In addition, the site is identified as providing foraging and commuting routes for bats. Lighting is currently limited along linear features which increases suitability for bats. Therefore, any new lighting included as part of the proposed development should be included within a sensitive lighting strategy for bats in line with Guidance Note GN08/23 (Institute of Lighting Professionals) and submitted to the LPA for approval as a condition of any consent to ensure that the impact of the development on bats using the site is minimised.

With regard to mandatory biodiversity net gains, it is highlighted that we now support the submitted Statutory Biodiversity Metric – Calculation Tool (Revision A) (March 2026) and the Statutory Metric Condition Assessment Sheets (September 2025). Biodiversity net gains is a statutory requirement set out under [Schedule 7A \(Biodiversity Gain in England\) of the Town and Country Planning Act 1990](#) and we are satisfied that submitted information provides sufficient information at application stage. As a result, a Biodiversity Gain Plan should be submitted prior to commencement, which also includes the following:

- a) A Biodiversity Gain Plan form (Ideally using the Government's template: <https://www.gov.uk/government/publications/biodiversity-gain-plan>)
- b) The completed metric calculation tool showing the calculations of the pre-development and post-intervention biodiversity values.
- c) Pre and post development habitat plans.
- d) Legal agreement(s)
- e) Biodiversity Gain Site Register reference numbers (if using off-site units).
- f) Proof of purchase (if buying statutory biodiversity credits at a last resort).

In addition, a [Habitat Management and Monitoring Plan](#) (HMMP) should be secured for all [significant on-site enhancements](#). Based on the submitted post-intervention values as they are currently submitted and Government Guidance on what constitutes a significant on-site enhancement, recommendations on the habitats that should be classified as a significant on-site enhancement have been outlined in the BNG tables below.

The decision on whether significant on-site enhancements are present is ultimately up to the Council. Where present, the maintenance and monitoring of significant on-site enhancements should be secured via planning obligation for a period of up to 30 years from the completion of development. This will be required to be submitted concurrent with the discharge of the biodiversity gain condition. Therefore, the LPA is encouraged to secure draft heads of terms for this planning obligation at application stage, to be finalised as part of the biodiversity gain condition.

Alternatively, the management and monitoring of significant on-site enhancements could be secured as a condition of any consent. The monitoring of the post-development habitat creation / enhancement will need be provided to the LPA at years 1, 3, 5, 10, 15, 20, 25, 30, unless otherwise specified by the LPA. Any remedial action or adaptive management will then be agreed with the LPA during the monitoring period to ensure the aims and objectives of the Biodiversity Gain Plan are achieved.

We are generally satisfied that the post-intervention values are realistic and deliverable.

We also support the proposed reasonable biodiversity enhancements for protected, Priority and threatened species, which have been recommended in the Ecological Impact Assessment (Tyler Grange, November 2025) to secure net gains for biodiversity, as outlined under Paragraph 187d and 193d of the National Planning Policy Framework (December 2024). Reasonable biodiversity enhancement measures are a separate matter to mandatory biodiversity net gains, and the finalised details should be outlined within a separate Biodiversity Enhancement Strategy to be secured as a condition of any consent.

This will enable LPA to demonstrate its compliance with its statutory duties including its biodiversity duty under s40 NERC Act 2006 (as amended) and delivery of mandatory Biodiversity Net Gain.

Impacts will be minimised such that the proposal is acceptable, subject to the conditions below based on BS42020:2013. We recommend that submission for approval and implementation of the details below should be a condition of any planning consent.

ANY RECOMMENDED CONDITIONS TO BE APPLIED:

1. ACTION REQUIRED IN ACCORDANCE WITH ECOLOGICAL APPRAISAL RECOMMENDATIONS

“All mitigation measures and/or works shall be carried out in accordance with the details contained in the Ecological Impact Assessment (Tyler Grange, November 2025) as already submitted with the planning application and agreed in principle with the local planning authority prior to determination.

This will include the appointment of an appropriately competent person e.g. an ecological clerk of works (ECoW) to provide on-site ecological expertise during construction. The appointed person shall undertake all activities, and works shall be carried out, in accordance with the approved details.”

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

2. CONCURRENT WITH RESERVED MATTERS PRIOR TO COMMENCEMENT: CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN FOR BIODIVERSITY

“A construction environmental management plan (CEMP: Biodiversity) shall be submitted to and approved in writing by the local planning authority.

The CEMP (Biodiversity) shall include the following.

- a) Risk assessment of potentially damaging construction activities.*
- b) Identification of “biodiversity protection zones”.*

- c) *Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (may be provided as a set of method statements).*
- d) *The location and timing of sensitive works to avoid harm to biodiversity features.*
- e) *The times during construction when specialist ecologists need to be present on site to oversee works.*
- f) *Responsible persons and lines of communication.*
- g) *The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.*
- h) *Use of protective fences, exclusion barriers and warning signs.*

The approved CEMP shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority"

Reason: To conserve protected and Priority species and allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

3. CONCURRENT WITH RESERVED MATTERS PRIOR TO ANY WORKS ABOVE SLAB LEVEL: BIODIVERSITY ENHANCEMENT STRATEGY

"Prior to any works above slab level, a Biodiversity Enhancement Strategy for protected, Priority and threatened species, prepared by a suitably qualified ecologist in line with the recommendations of the Ecological Impact Assessment (Tyler Grange, November 2025), shall be submitted to and approved in writing by the local planning authority.

The content of the Biodiversity Enhancement Strategy shall include the following:

- a) *Purpose and conservation objectives for the proposed enhancement measures;*
- b) *detailed designs or product descriptions to achieve stated objectives;*
- c) *locations of proposed enhancement measures by appropriate maps and plans (where relevant);*
- d) *persons responsible for implementing the enhancement measures; and*
- e) *details of initial aftercare and long-term maintenance (where relevant).*

The works shall be implemented in accordance with the approved details shall be retained in that manner thereafter."

Reason: To enhance protected, Priority and threatened species and allow the LPA to discharge its duties under paragraph 187d of NPPF 2024 and s40 of the NERC Act 2006 (as amended).

4. CONCURRENT WITH RESERVED MATTERS PRIOR TO OCCUPATION: WILDLIFE SENSITIVE LIGHTING DESIGN SCHEME

"Prior to occupation, a "lighting design strategy for biodiversity" in accordance with Guidance Note 08/23 (Institute of Lighting Professionals) shall be submitted to and approved in writing by the local planning authority. The strategy shall:

- a) *identify those areas/features on site that are particularly sensitive for bats and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example, for foraging; and*
- b) *show how and where external lighting will be installed (through provision of appropriate lighting contour plans and technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.*

All external lighting shall be installed in accordance with the specifications and locations set out in the scheme and maintained thereafter in accordance with the scheme. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority."

Reason: To allow the LPA to discharge its duties under the Conservation of Habitats and Species Regulations 2017 (as amended), the Wildlife & Countryside Act 1981 (as amended) and s40 of the NERC Act 2006 (as amended).

Optional condition:

Management and monitoring for significant on-site enhancements should be secured by planning obligation (either at application stage or the Biodiversity Gain Condition), to allow aftercare and monitoring to be secured for the 30-year period and the LPA to cover its monitoring costs. However, if the LPA would prefer that this is secured via a separate condition, the following pre-commencement condition could be used:

5. CONCURRENT WITH RESERVED MATTERS PRIOR TO COMMENCEMENT: HABITAT MANAGEMENT AND MONITORING PLAN (HMMP)

A Habitat Management and Monitoring Plan (HMMP) for significant on-site enhancements, prepared in accordance with the approved Biodiversity Gain Plan, shall be submitted to, and approved in writing by the local authority, prior to commencement of development, including:

- a) *a non-technical summary;*
- b) *the roles and responsibilities of the people or organisation(s) delivering the HMMP;*
- c) *the planned habitat creation and enhancement works to create or improve habitat to achieve the on-site significant enhancements in accordance with the approved Biodiversity Gain Plan;*
- d) *the management measures to maintain habitat in accordance with the approved Biodiversity Gain Plan for a period of 30 years from the completion of development;*
- e) *the monitoring methodology in respect of the created or enhanced habitat to be submitted to the local planning authority; and*
- f) *details of the content of monitoring reports to be submitted to the LPA including details of adaptive management which will be undertaken to ensure the aims and objectives of the Biodiversity Gain Plan are achieved.*

Notice in writing shall be given to the Council when the:

- *initial enhancements, as set in the HMMP, have been implemented; and*
- *habitat creation and enhancement works, as set out in the HMMP, have been completed after 30 years.*

The created and/or enhanced habitat specified in the approved HMMP shall be managed and maintained in accordance with the approved HMMP.

Unless otherwise agreed in writing, monitoring reports shall be submitted in years 1, 3, 5, 10, 15, 20, 25, and 30 to the Council, in accordance with the methodology specified in the approved HMMP.

The Council shall only issue approval of the habitat creation and enhancement works until:

- the habitat creation and enhancement works set out in the approved HMMP have been completed; and*
- a completion report, evidencing the completed habitat enhancements, has been submitted to, and approved in writing by the Local Planning Authority.*

Reason: To satisfy the requirement of Schedule 7A, Part 1, section 9(3) of the Town and Country Planning Act 1990 that significant on-site habitat is delivered, managed, and monitored for a period of at least 30 years from completion of development.

ANY RECOMMENDED INFORMATIVES TO BE APPLIED:

Biodiversity Gain condition

Natural England advises that the biodiversity gain condition has its own separate statutory basis, as a planning condition under [paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990](#). The condition is deemed to apply to every planning permission granted for the development of land in England (unless exemptions or transitional provisions apply), and there are separate provisions governing the Biodiversity Gain Plan.

The local planning authority is strongly encouraged to not include the biodiversity gain condition, or the reasons for applying this, in the list of conditions imposed in the written notice when granting planning permission. However, it is highlighted that biodiversity gain condition could be added as an informative, using [draft text](#) provided by the Secretary of State:

“Biodiversity Net Gain

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for the development of land in England is deemed to have been granted subject to the condition “(the biodiversity gain condition)” that development may not begin unless:

- (a) Biodiversity Gain Plan has been submitted to the planning authority, and*
- (b) the planning authority has approved the plan.*

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan if one is required in respect of this permission would be Hinckley & Bosworth Borough Council.

There are statutory exemptions and transitional arrangements which mean that the biodiversity gain condition does not always apply. These are listed in paragraph 17 of Schedule 7A of the Town and Country Planning Act 1990 and the Biodiversity Gain Requirements (Exemptions) Regulations 2024.

Based on the information available this permission is considered to be one which will require

the approval of a biodiversity gain plan before development is begun because none of the statutory exemptions or transitional arrangements are considered to apply.”

PRE-DEVELOPMENT HABITAT BASELINE FOR BIODIVERSITY NET GAIN (BNG)	
THIS IS THE MINIMUM NATIONAL ESSENTIAL INFORMATION REQUIREMENTS (PPG paragraph 11) AND MUST BE SATISFIED PRIOR TO DETERMINATION:	
Confirmation that development is subject to statutory biodiversity gain condition	Y
Pre-development Habitat Plan of existing onsite habitat (to scale)	Y
Pre-development Habitat Value (on date of application or earlier)	Y
Completed Metric Calculation Tool	Y
Statement of Habitat Degradation where present (with dates and details)	N/A
Reason for proposing an earlier date if applicable (ie. degradation)	N/A
Description of Irreplaceable Habitat where present	N/A
SMALL SITES METRIC ONLY: “Competent person” information (ie. qualifications, skills, experience)	N/A
BNG METRIC INFORMATION missing or incorrect:	
Incomplete or incorrect cells are shown in metric (eg. habitat quantity, type or condition, strategic significance)	N

POST DEVELOPMENT PROPOSALS FOR BIODIVERSITY NET GAIN (BNG)	
PLEASE NOTE: THIS IS NOT ESSENTIAL INFORMATION PRIOR TO DETERMINATION. Post-development information is indicative only ; final proposals must be confirmed at Biodiversity Gain Plan statutory condition stage.	
ON-SITE SIGNIFICANT* BNG is proposed (If Y, please see later table)	Y
OFF-SITE APPLICANT-OWNED BNG is proposed (ie. Land shown on plan within the “blue line” boundary and inserted in “offsite” tab of statutory metric)	N
PLEASE NOTE: Where applicant-owned off-site or significant on-site BNG proposals are present, these should be secured and monitored for 30 years. The determining authority is responsible for monitoring for compliance.	
OFF-SITE PURCHASE** of BNG	
BNG units purchase from a third party to achieve 10% BNG uplift	Y
Statutory biodiversity credits	N
PLEASE NOTE**: Where purchased BNG units are proposed, any purchased units from the national register are secured and monitored for 30 years by conservation covenant, separately from this planning application process.	

POST DEVELOPMENT PROPOSALS: *TYPE OF SIGNIFICANT ON-SITE HABITAT PROPOSED: (using the current government definition ¹)

¹ <https://www.gov.uk/guidance/make-on-site-biodiversity-gains-as-a-developer#significant-on-site-enhancements>

SIGNIFICANCE AS DEFINED IN PPG	POST DEVELOPMENT HABITAT TYPE PROPOSED	NUMBER OF UNITS
Medium or High Distinctiveness	Other neutral grassland Mixed scrub Urban tree Species-rich native hedgerow with trees - associated with bank or ditch Species-rich native hedgerow with trees Species-rich native hedgerow	4.52 1.93 1.03 1.03 0.91 0.13
Large number of units at Low Distinctiveness	N/A	N/A
Significant increase in Distinctiveness, Condition or Area	Species-rich native hedgerow with trees (Low to high distinctiveness) Species-rich native hedgerow with trees - associated with bank or ditch (Low to very high distinctiveness) Species-rich native hedgerow with trees (Low to high distinctiveness)	0.54 1.44 1.19

Note for applicants: Please be aware that this advice is provided to the Local Planning Authority through a Service Level Agreement between the Local Planning Authority and Leicestershire County Council Ecology Team. Its purpose is to discharge the legal duties of the determining authority under The Local Authorities (Functions and Responsibilities) Regulations (2000), Regulations 4.

If you have any queries about the content, please correspond directly with the Planning Officer assigned to the planning application or discharge of condition application. We are unable to respond directly to applicant enquiries regarding the advice that we have provided to the determining authority.

The following legislation is used to assist in the assessment of planning applications:

Legislation source	Reference
National Planning Policy Framework	Paragraphs relevant to biodiversity, biodiversity net gain, ecological connectivity and protected species
Environment Act 2021	Mandatory Net Gain Biodiversity Duty Local Nature Recovery Strategy
District or Borough Local Plan and supporting SPD's	Local Plan policy
ODPM circular 06/2005: Biodiversity and Geological Conservation	Requirement for species survey work and mitigation recommendations to be carried out prior to the determination of a planning application. Paras. 98 and 99
NERC Act 2006	Biodiversity Duty (see also Environment Act 2021) Section 41, habitats and species of Principal Importance (previously BAP)
Various International, European and National laws in relation to	International and national site protection: Ramsar sites (from Ramsar Convention), Habitat and Birds Directives (Natura 2000 sites include

the protection of species and habitats	SAC's and SPA's), SSSI's, National Nature Reserves, Local Wildlife Sites, Local Nature Reserves. Habitats and Species protection: Habitat and Species Regulations (protected sites and species). Wildlife and Countryside Act 1981 (as amended including special Schedule 1), Natural England Standing Advice. Badger Act.
