

PLANNING NOTES:
The details shown on this drawing are to form part of a planning application. They are not intended to be used for construction at this stage.
The proposal for a raft foundation has come from Historic England and is believed to be so as to minimise any potential disruption to archeological items below the ground.
The proposal here is for a flat raft foundation without the need for any thickenings around the perimeter, this will reduce the dig depth in accordance with the requirement from Historic England in the point above.
