Description

Please describe the proposed development

Outline planning is requested for the erection of a 49 bedroom hotel, new access, car parking and facilities adjacent to the existing Golf Club. This will enable the applicant to expand their business, and follows on from recent refurbishment of the clubhouse facilities. This development will allow the hotel to provide hotel accommodation for the use of golf club guests alongside other visitors including those attending events at the golf club.

The proposal is to erect a 49-bedroom hotel comprising of:

49 bedrooms
Priority 'T' junction
60 car parking spaces, of which 6 will be disabled spaces
20 parking spaces will have EV charging points with infrastructure from the outset to implement 100% as demand grows
15 cycle spaces with Sheffield stands
Bin storage
Compliance with NFC STAG requirements
Net unit gain change for biodiversity in excess of 10% within the overall golf club site

The proposed hotel will be designed to reflect high quality features in keeping with local planning policy and NPPF guidelines to ensure that it is well integrated within its surroundings and suited to its purpose as a place of golf and leisure coupled with a relaxed atmosphere for functions and meetings alike within the National Forest. The building design will be highly sustainable meeting low energy and low carbon principles using renewables to support the buildings energy needs which will be reflected in the buildings specific design at full application stage..

The hotel is specifically designed to meet the Passive House requirements of the National Forest Design Guidance.
