To whom it may concern:

I have inspected the site of the farmhouse at Craigmore Farm and in my opinion the area of the dwelling and its immediate surrounding is not suitable for the safe grazing of livestock in its existing state. The exposed foundations and large expanse of concrete in the middle poses a danger to grazing animals especially in wet or icy conditions with a serious risk of injury. Any such injury may lead to the destruction of the animal if injuries are severe.
Mr Goodman has maximised the area of safe grazing by moving fence boundaries.
