Holding Objection - Further information required		
REASON FOR RECOMMENDATION:		
• The Bat Survey completed by Stefan Bodnar (May 2026) has been reviewed. The dwelling was assessed as having negligible bat roosting potential and remains in good condition, with no evidence of features suitable for roosting bats. • Therefore, no further bat surveys are required. • Biodiversity Enhancements: Suitable enhancements in the form of swift boxes are recommended within Section 5 of the report. These are supported by a separate document detailing the proposed locations and model types. This is considered acceptable, and the following condition is therefore recommended.		
ANY RECOMMENDED CONDITIONS TO BE APPLIED:		
• The development hereby approved shall be carried out in accordance with the revised plans (As Proposed_1, Dwg No. 08d, Feb 2026), unless otherwise agreed in writing by the Local Planning Authority.
